

Loaded Mayville Upsets Chevs; 1st Half Playoff Thurs.

KEWASKUM TO FACE BELLS SUNDAY AND THURSDAY IN CRUCIAL GAMES TO DECIDE 1ST, 2ND HALF TITLES

The Kewaskum Chevrolts, who were undefeated in the second half until Sunday, were upset by a well "loaded" Mayville team here Sunday night, 87-84, in a tight contest. The setback, along with West Bends win over Horicon, resulted in a first place tie between the Chevrs and Lithias, each of which has won four games and lost one.

Mayville, which has not been too strong all season and was beaten easily by Kewaskum in their first meeting there, came here Sunday with two ringers in their lineup. They were Forward Art Finke, who returned to the lineup for the first time this season, and Guard Griepentrog, a member of the University of Wisconsin freshman team. Neither one had been on the Mayville team all season and played only in this game against Kewaskum.

This pair was responsible for downing the Chevrs. Without them the locals would have won handily. Griepentrog was the star of the game with 34 points and Finke was close behind with 29. They almost won the game alone by scoring 63 points between them. Manager "Cisco" Backhaus protested the game to League Director Ray Pirrelli of West Bend, who claimed they were eligible to play. This is understandable but it is fair that Kewaskum should lose a game and undisputed first place because of these two players when neither West Bend nor Campbellsport had to play against them? West Bend, the Bells and Kewaskum all are in the running for the championship. Finke and Griepentrog joined Mayville after their games with West Bend and Campbellsport were completed. Sunday's defeat may cost the Chevrs the second half title and grand championship.

The contest was a good one and was close throughout even against the odds. Mayville was ahead by one point, 26-25, at the quarter and also at the half, 44-43. Led by the unstoppable Griepentrog and Finke, who scored 22 and 13 points respectively in the second half, Mayville took a big 70-54 lead in the third period. But a determined Chevrolet five fought back in the final quarter and almost closed the gap, trailing by just three points at the final whistle.

Center Hanrahan was the top scorer for the losers with 20 points followed by Don Meisenheimer and Argie Bilgo with 17 apiece. Bartlett also contributed 16 for Mayville.

This Sunday Kewaskum plays its last scheduled game of the season at Campbellsport in a tilt that may decide the second half title. Campbellsport is a game behind Kewaskum and West Bend. Should the Bells win and the Lithias lose to Cedarburg all will be tied for first place. If the Chevrs and West Bend both win they will tie for first and necessitate a playoff. If the Lithias win and Kewaskum loses, West Bend will cop the crown and vice versa.

Then next Thursday night the Chevrolts play Campbellsport again to settle the first half championship. This contest will take place on a neutral floor at Horicon. Kewaskum, the Bells and West Bend all tied for the first half title. In the first game of the playoff Campbellsport beat West Bend knocking them out of the first half running. Now the Chevrs meet the winner, Campbellsport, for the championship.

LAND O' LAKES STANDINGS

Team	Won	Lost
Kewaskum	4	1
West Bend	4	1
Campbellsport	3	2
Mayville	3	2
Horicon	2	3
Rosendale	2	4
Cedarburg	0	5

Scores last week end—Mayville 87, Kewaskum 84; West Bend 79, Horicon 70; Rosendale 78, Cedarburg 65.

Games Sunday—Kewaskum at Campbellsport, Cedarburg at West Bend.

Chiropractor Will Open Office Here

Dr. Howard L. Rumsey of Milwaukee plans to open an office and practice chiropractic in Kewaskum on or about the 15th of March. His wife Mary and daughters, Debra Marie and Doreen Mary plan to join him here as soon as living quarters are found.

Dr. Rumsey attended college and served two years internship at the Lincoln Clinic in Indianapolis, Indiana. He was graduated from the college honor roll.

The chiropractor's birthplace is Fond du Lac. His service time was spent with the Armed Forces in Korea.

The office will be located in the real estate office formerly occupied by Harry H. Maaske on Fond du Lac Ave.

His office hours will be: Monday and Wednesday, 2 p. m. to 9 p. m.; Tuesday and Thursday, 9 a. m. to 2 p. m.; Friday, 1 p. m. to 4 p. m.

Number of Families Move in Past Week

Mr. and Mrs. William McCarty and family have moved from the K. A. Honeck Sr. home just south of the village on Hwy. 45 into their new home in Roseland Heights recently built by Louis Bunkelman and Son.

Mr. and Mrs. Leonard Rindt and sons and Don Below have moved from the Schultz Bros. home in Roseland Heights to the K. A. Honeck, Sr. residence vacated by the McCarty family.

Mr. and Mrs. Donald Heacock moved from the other Schultz Bros. home in Roseland Heights into one of the apartments in the new home being erected by Walter Del in the Belger addition on the east side of the village. Mr. and Mrs. Allen Dreher and daughter will move into the other apartment in the Del home. They have moved from the Lee Honeck home in the Stark addition and are now residing with Mr. and Mrs. Del until the apartment will be completed late this month.

Mr. and Mrs. Art Schultz and his mother-in-law of R. I. Cascade have moved into one of the homes and Otto Schultz and two sons of the same address into the other of their homes in Roseland Heights vacated by the Heacocks and Rindt family.

NOTICE OF SPECIAL MEETING of the electors of KEWASKUM COMMUNITY UNION FREE HIGH SCHOOL DISTRICT NO. 2 OF THE VILLAGE OF KEWASKUM, WASHINGTON COUNTY, WISCONSIN; KEWASKUM, BARTON, FARMINGTON AND WAYNE TOWNSHIPS, WASHINGTON COUNTY, WISCONSIN; ASHFORD AND AUBURN TOWNSHIPS, FOND DU LAC COUNTY, WISCONSIN.

Notice is hereby given that petitions signed by more than 15 electors have been filed with the undersigned clerk which petitions except for salutations and signatures were as follows:

"The undersigned electors of said Union Free High School District Number 2 respectfully request that a special meeting of said High School District be called at the earliest possible date for the transaction of the following business:

The reconsideration of the action taken at the special district meeting held on February 14, 1955, relating to the selection of a site for the erection of a proposed new union free school building, and

The selection of a site for the erection of said proposed new union free high school building."

Notice is further given that pursuant to such petition and for the purposes therein stated there will be held a special meeting of the electors of said school district at 8:00 o'clock in the evening on the fourteenth day of March, 1955 at the high school gymnasium.

Dated this second day of March 1955.

Clifford C. Stautz,
District Clerk

Reconsideration of New School Site Is Asked, Meet Called

A petition has been circulated asking that members of the school board of District No. 2 of the Kewaskum Union Free High School district reconsider their action in purchasing a tract of land for construction of the proposed new high school.

At a meeting of electors of the district held Feb. 14, the voters cast a majority ballot for purchase of a site located in Roseland Heights and the William Volm farm on the southwest end of the village.

Since then those opposed to the site have circulated the petition asking reconsideration. Another special meeting of the district has been called for Monday, March 13, in the high school gymnasium. Details will be found in a notice elsewhere on this page.

Other tracts of land voted on at the Feb. 14 meeting were the AUGUST C. Bilgo and Walter and Ada Mellahn sites, which were eliminated in the first balloting, and the Breseman, Ramthun and Kober tract, which lost out in the final balloting to the Rosenheimer-Volm site.

FFA Father, Son Banquet Is Held at High School

The first annual FFA father and son banquet was held at 7:30 p. m. Tuesday, March 1, in the Kewaskum High school gymnasium. A ham dinner was served. Girls of the school FFA chapter served the banquet with 92 persons present.

The program which followed the banquet featured a guest speaker, Don Hale, state FFA vice-president of Section 5 from Clinton, Wis.; President "Pat" Miller of the Kiwanis club of Kewaskum; Kurt Pamperin, FFA speaking contest winner; Dan Panzer, 2nd place winner in the speaking contest; an achievement report by Carl Meyer and Ken Blank; a future plans report by Del Haack; an FFA quartet and pep band presenting several good numbers for entertainment.

Orval Behnke, instructor of agriculture at the high school, feels that this was a very successful father and son get-together and hopes to carry on this affair every year.

NEW FANE WINS DARTBALL TOURNAMENT CHAMPIONSHIP

The New Fane No. 1 team won 19 straight games in the Lutheran Kettle Moraine dartball tournament held at McLane school gym at West Bend last week end to cop first place. A total of 20 teams took part in the tourney, including Kewaskum, which placed twelfth.

The tournament was a round robin affair between the eastern and western division teams. Second place was won by Dundee, followed by Slinger in third and Scott No. 1 in fourth. Trophies were awarded the first four teams.

Results of the tourney were as follows:

Team	Won	Lost	Runs
New Fane I	19	0	71
Dundee	8	2	47
Slinger	7	3	45
Scott No. 1	6	4	59
Potawia	6	5	42
Adell	6	4	37
Theresa No. 1	6	4	37
Woodland	6	4	36
Newburg	6	4	35
New Fane II	6	4	34
Sherman	5	5	43
Kewaskum	4	6	36
Scott No. II	4	6	34
Hullaburg	4	6	23
West Bend No. I	4	6	24
Kohlville	4	6	24
Lomira	3	7	24

Miss Ewert Bride of Donald Solheim

In a ceremony performed in St. John's Lutheran church, West Bend by the Rev. W. P. Sauer at 4 p. m. Saturday, Feb. 19, Donald Solheim, R. 1, Kewaskum, took as his bride Miss Doris Ewert, daughter of Mrs. Lora Ewert, West Bend.

The bride's gown of hand clipped white rose point lace was styled with a bouffant skirt of tulle over a lace trimmed underskirt. Lace applique outlined the scoop neckline. Crown pearls and lace trimmed the gown which held her fingertip veil. She carried white carnations and stephanotis.

The bride was attended by her cousin, Mrs. Harold Kluz, as matron of honor in a light blue crystal-lence ballerina length gown embellished with a scalloped neckline. She wore a wreath of yellow flowers in her hair and carried a colonial bouquet of yellow and white carnations. Mrs. Richard Hahn, a friend of the bride, as bridesmaid, wore an identical gown and head piece. She carried a colonial Louquet of yellow carnations.

Lloyd Keller, a friend, attended the bridegroom as best man while Kenneth Cudnoskoske served as groomsman. Ralph Ewert was usher.

A reception was held at the VFW hall in West Bend, followed by a supper served in St. John's school hall.

The couple will reside in West Bend, the bridegroom being employed by the Line Material Co. Barton. The bride, a graduate of West Bend High school, is employed at the Amity Leather Products Co. office in West Bend.

SHEEPSHEAD TOURNAMENT

Sheepshead tournament at Heiler's tavern, Kewaskum, Monday evening, March 7. Entry fee \$2.00. All are invited.

New Police Chief Takes Oath, Begins Duties on Tuesday

Roland Pledl of Milwaukee was sworn in as chief of police of the village of Kewaskum on Tuesday morning and officially began his new duties the same day, March 1. Pledl recently retired from the Milwaukee police force following 25 1/2 years of service.

The new chief was sworn in by Village Commissioner William S. Martin in a ceremony held in the municipal building at 10 a. m. Village President Charles Miller presented Pledl with his chief's badge and presented him with the keys to the new 1955 model squad car purchased and furnished by the village.

Present at the ceremonies when the new chief of police, as the officer will be called in the future, took office were the members of the village board, Kewaskum businessmen, Milwaukee members and friends of the Pledl family and police associates who worked with him in that city.

Pledl, who resides at 5477 N. 41st street in Milwaukee, is 50 years old, is married and has three children, William, 22, Vivien, 21, and John, 8. At present he is staying at the Clifford Stautz home temporarily. The Pledl family will move to Kewaskum some time in June.

The new chief succeeds Gerhard "Jerry" Guttman, who resigned recently.

RETTLER NAMED COUNTY HIGHWAY COMMISSIONER TO SUCCEED A. BECKER

The Washington county board convened last Monday morning for its first meeting of 1955 at the county court house and announced the resignation of Highway Commissioner Art Becker. Becker who has been an employee of the highway department 35 years, resigned effective Monday, Feb. 21, because of ill health.

The new highway commissioner is Albert P. Rettler, who was sworn in Monday evening by County Clerk Anton P. Staral to succeed Becker. Rettler, a native of Hartford, has been working for the county highway department since 1947. He is now a resident of West Bend, Becker, former commissioner, is a patient at St. Joseph's hospital, Hartford, since Tuesday.

The county board received several applications for the position. Members voted to draw up a resolution commending Becker for his many years of service to the county. He began working with the highway department 35 years ago and started at the bottom.

Among other business transacted Monday the resignations of William T. Leins and Carl F. Schaefer, Kewaskum, as members of the County Welfare board were officially accepted by the board of supervisors. They tendered their resignations a short time ago. A motion was also brought before the board to continue to operate with the present five man welfare board.

A bill was submitted, among other things, to the board by former welfare director Eugene Brumm for \$2,500 for duties performed as agent for Blue Cross, Social Security and the retirement setup of Washington county employees. The claim was over for further study.

FLY TO FLORIDA FOR CARIBBEAN AIR CRUISE

Mrs. Clara Langenbach and Miss Ursula Klima of West Bend, accompanied by Mrs. Marie Strachota of St. Kilian, left Chicago Monday by plane for a Caribbean air cruise with visits in Cuba, Jamaica and Haiti. Mrs. Strachota will also visit a daughter, Mrs. Ray Groose at Hallandale, Florida.

IN THE SERVICE KIRCHNER HAS FURLOUGH

Pvt. Elton Kirchner arrived home on Feb. 12 to spend a furlough with his parents, Mr. and Mrs. Oscar Kirchner, R. 2, Kewaskum, and relatives. He left again on Thursday morning, Feb. 24, to complete his basic training with the 6th Armored Division at Fort Leonard Wood, Mo.

Four-H Club members learn first hand about management of soil, water, wildlife and forests.

State Beagle Club Meets Here, Elects

The annual meeting of the Wisconsin Beagle club, the oldest club of its kind in the state, was held Sunday in the Kewaskum Municipal building. The club again awarded the annual fall field trial and bench show to be held at Kewaskum.

All officers of the club were re-elected at Sunday's meeting. They are Joe Eberle, Kewaskum, president; Tom Heintz, Hartford, vice-president; Ervin Kopp, Johnson Creek, secretary-treasurer; John L. Schaefer, Menomonee Falls, and Walter Huenhold, Milwaukee, field marshals.

The club also voted to accept junior members into its organization in order to get them interested in beagles as well as to provide outdoor sport and recreation for youths.

Kohlville Church Will Present Lenten Pageant

On Sunday evening, March 27, at 8 o'clock, a colorful Lenten pageant will be presented by St. John's Men's Brotherhood of Kohlville. The pageant, the institution of "The Lord's Supper," will be portrayed by twenty-four laymen from this congregation.

The Women's Guild of the church is designing the men's robes and the men are building the sets for the production which includes scenes from the life of Christ, where he taught in the temple, and of course, the Upper Room. The entire pageant is based on the four Gospels account of "The Supper" as recorded in the Holy Bible.

As St. John's church seating capacity is limited, the Brotherhood is selling one-dollar donation passes to assure the public that there will be ample room for them. Children under twelve-years of age will not be admitted to the service.

Passes may be obtained at Missions' Gift Shop, West Bend; the Carl Endlich residence, 1005 Sunset Dr., West Bend, from Rev. L. Riesch, R. 3, West Bend, and members of the Brotherhood.

The two organizations working on this project are under the leadership of Mrs. L. Roecker and Carl Becker. The public is cordially invited to attend this sacred production of "The Last Supper."

LOCAL STUDENT WILL BE IN CARROLL COLLEGE CONCERT

Audray Schaefer, Kewaskum, is a member of the band at Carroll college which will present a public concert in March. It was announced this week by C. Dale Fjerstad, director. The organization has concluded its season as a pep band for the basketball games and will give its first formal concert on March 10.

The musical program will include the "Storm King" march by Finlayson, selections from "Carousel" by Richard Rodgers, "Carnival Day in New Orleans" by Morrissey, and selections from Strauss, Coates, and Holst.

Miss Schaefer, daughter of Mr. and Mrs. Ray Schaefer, plays the clarinet in the band. She is a freshman at Carroll.

HUSTISFORD TROUNCES KEWASKUM RIVERS FIVE

The Kewaskum Rivers team cellar dwellers in the league, lost their sixth straight in the second half here Sunday night when Hustisford floored them, 77-47. Filmore lost to Horicon over the week end and as a result Hartford clinched the second half tilt.

Hustisford was ahead of the Rivers quint through the tilt. B. Kuehl and Leitzke paced the winners with 17 and 15 points respectively while others on the team were close behind. S. Hawig with 16 and M. Seefeldt with 13 were tops for Kewaskum.

This Sunday Kewaskum closes its season at Hartford against the second half champions.

BIRTH

GUTJAHR—A son to Mr. and Mrs. Glenn Gutjahr, R. 3, Kewaskum, Wednesday, Feb. 23.

Kewaskum Wins Championship in District Tourney

INDIANS BEAT OMRO IN FINALS AT WINNECONNE; MOVE ON TO DISTRICT PLAYOFF AT PLYMOUTH AGAINST OOST- BURG

The Kewaskum High school Indians, who finished second in the Tri-County conference race the past season, added new honors to their record by winning the W.L.A.A. district basketball tournament championship at Winneconne Saturday night. They defeated Omro Winneconne sub-district titlists, in the finals, 73-65.

By winning the district crown, Kewaskum advanced another step, moving on to a district playoff game at Plymouth on Friday night of this week where they played Oostburg, champion of the Plymouth district meet. The winner there will advance to sectional tournament play. The Indians played a non-conference game against Oostburg at the start of the season and were defeated but they hoped to turn the tables in the tourney playoff.

Kewaskum reached the district tournament by winning the sub-district meet at Campbellsport. There they trounced Oakfield 62-43, in the opening round Tuesday and went on to nose out Campbellsport, 42-41, in the finals Thursday. After beating the Bells twice handily during the regular season, the Indians had their hands full in the tourney as Campbellsport fought down to the whistle. Harold Klein and Tom Peterson were leading scorers for the winners with 14 and 10 points. Ray Jaeger led the Bells with 12. Oakfield downed North Fondy, 34-31, in the consolation finals.

The district championship tilt at Winneconne was close until the final quarter when the Indians pulled away to an eight point victory. Kewaskum moved into a 20-16 advantage in the initial quarter but was outscored in the second period 27-24 to give Omro a 34-17 halftime lead. In a close third stanza, the Indians tallied 17 points to their opponents' 14 and regained the lead, 58-57, going into the final quarter. Then Kewaskum came through and showed which was the better team. They dropped in 15 points to Omro's 8 and won going away.

Forward Harold Klein was the scoring ace for the champions with 20 points. However, it was an all-around team victory with six other Indians taking part in the point production. Both Mark Rosenheimer and Barney Skrentny had 12 points. Forward Allen, with 25 points, and Center Trevelyan with 17, paced Omro. Omro reached the district finals by defeating Rosendale, 67-63, in the sub-district final. Other teams competing at Winneconne were the home school and Hortonville. Oakfield and Hortonville tangled for consolation honors at Winneconne.

Kewaskum is the only team in the Tri-County conference to survive in district tourney action. Brandon, the league champion, with 12 straight wins, was defeated by Randolph in the Juncon district finals after running their streak to 11 victories in a row without a defeat during the season. They were staked by Randolph, 62-59, when their two stars, the Mollien brothers, fouled out.

Kewaskum's champions were awarded trophies for coping district honors.

SPEAKING CONTEST HELD BY LOCAL FFA CHAPTER

A speaking contest was held by the Kewaskum FFA chapter at the high school with Kurt Pamperin the winner. Other contestants were Dan Panzer, Norman Forster, Maurice Gahman, James Enderle and Dan Kelly.

Kurt Pamperin represented the local chapter at the district speaking contest held at Rosendale on Monday.

HOSPITAL NEWS

Mrs. John F. Schaefer, Kewaskum is a patient at St. Joseph's hospital, West Bend. She suffered an injury in a fall.

NICE—Overcoats are a comfort, not a fashion "must" as visitors through the Promenade des Anglais at Nice, swank French resort. Cold from northern Europe's worst-in-years storms has made itself felt even on the Riviera.

THEY MAKE LIKE PORPOISES ON PURPOSE—Chief Petty Officer Instructor W. J. Saunders, left, and Able Seaman Ernest Dooley resemble playful porpoises, but only coincidentally. They're surfacing after a 100-foot descent into the submarine tank at the Royal Navy's submarine training school, Portsmouth, England.

CAN'T DO A THING WITH IT—Thelma Chaney is going to have trouble with her hairdo just as long as she has her hand on this Van de Graf electrostatic generator, at the University of Washington, in Seattle. Static electricity with which she's charged drains into atmosphere through her hair.

Carrier Forrestal Launched Lately

What will be the world's largest warship, the aircraft carrier Forrestal, was recently launched at Newport News, Virginia. The Forrestal will displace more than 70,000 tons, fully loaded, and represents a completely new series of carriers.

The contract for the huge warship was let in July, 1951, but its construction schedule has fallen almost a year behind. The keel was laid in July, 1952, but the big ship is not expected to get into operation until late next year.

The final cost of the Forrestal is expected to top \$200,000,000, which does not include the cost of her complement of some 100 aircraft.

Since the Forrestal was authorized, three other huge carriers have been authorized, and a fifth Forrestal-type carrier is thought to be in the budget to be presented to the Eighty-Fourth Congress as this is written. The second ship in this series is the Saratoga, and is under construction at the New York Naval Shipyard in Brooklyn.

The Ranger, the third in this series, has been authorized, and will be built at Newport News, as was the Forrestal. The fourth huge carrier has not been named, but will be built at the Brooklyn Navy yard.

This series of carriers is being built in line with a ten-year carrier-a-year program laid down by Dan A. Kimball, Secretary of the Navy under former President Harry Truman. At the end of another ten years, the United States will probably have ten super-carriers which will outclass anything else of its type in the world. What happens to these huge ships in any new war will probably finally answer the question whether carriers are out-of-date in view of the arrival of the atomic bomb.

Tap Sun's Energy

From laboratories in New York comes word that a new solar battery has been developed which utilizes the sun's light to produce electricity. The developers of the new battery were G. O. Pearson, G. S. Fuller and D. M. Chapin.

The new-type battery utilizes strips of silicon, which are described as being about razor-blade size. Since these metal strips are sensitive to light, they can be linked together to form an electrical generator which, reportedly, produces fifty watts per square yard of surface area.

This is an important step in that it may herald the arrival of the long-sought permanent type battery. Present-day batteries are not actually storage batteries, as so many people believe, but they manufacture their electrical current by a chemical process, and when the chemical elements are dissipated in the battery, it is no longer productive.

The new battery would be an almost permanent type battery, since the metal strips which receive the sun's rays would last almost indefinitely if properly cared for. Such a battery seems on the way, although its arrival may be years away as yet.

"Mister Fixum's Handy Hints"

BY ERNIE GARDNER

SCREWS STOP FLOOR SQUEAKS

This is a continuation of last week's article on how to stop floor squeaks with nails.

Sometimes people are not very successful in locating, or prefer not to try locating the floor joists. In that case, screws can be used instead of nails, and it is not necessary to locate the floor joists.

The squeak is caused by two layers of flooring rubbing together. Of course, it is desirable that the flooring be securely tied to the joists with nails.

The idea is to draw the two layers of flooring together with screws, thus eliminating the squeak. Here is the way to do the job.

1. Bore a hole in the finish flooring with an auger bit, 1/4-inch deep. The size hole will be determined by the size plug you can cut to fill the hole. See Step 5.

2. Drill a 3/16 inch hole through the finish flooring, and in the center of the bored hole. This hole should be large enough that the threads of the screw do not hold in the finish flooring.

3. Drill a 1/8-inch hole all the way through the sub-flooring. This hole should be small enough that the threads of the screw will have to cut their own threads in the wood. Sometimes this hole is not drilled at all. If the sub-flooring is not too hard, the screw may be started with a tap of the hammer, and driven the rest of the way with the screw driver.

4. Draw the two layers of flooring together with a 1-inch No. 10 flat head screw. A round head screw could be used in place of the flat head screw. A screw larger or smaller than a No. 10 could be used, but the size of the drilled holes would be different.

5. Cut a wood plug the same size as the bored hole, and glue it in place. If the flooring is oak, the plug should also be cut from oak wood. The plug should be 1/4-inch thick. The plugs may be cut by hand, or they may be cut with a plug cutter, which you can buy at a hardware store. Be sure to buy a plug cutter the same size as the hole you are boring.

6. When the glue has dried, sand the plug even with the surrounding floor. Then finish the floor with the same kind of finish used before. The spots will be lighter at first but will darken in a few weeks.

7. Note in the illustration that screws are located in a relatively small area at first. If these do not stop the squeak drive some more screws in a larger area. Testing the floor will tell where more screws are needed.

'54 Birth Rate Sets New Record

Recent figures show that the number of babies born in 1954 set a new record in the United States. Tentative figures show over 4,100,000 1954 births.

The significance of this record crop of babies is further increased by the fact that it represents the fifteenth year of successive increase in the U. S. birth rate.

The long-term economic result of this trend is to be felt within five years. There seems to be little doubt but that the babies born in the early Forties will begin to earn salaries and wages increasingly in the next five years. By 1960, the number of students entering college and entering the job market will be rapidly rising and, thereafter, the effects will be felt on a very broad economic front.

These figures have led many experts to be optimistic about the future in the United States. There seems little doubt that the soaring birth rate in the United States will increase the demands for goods and services and education in this country to a prosperous high in the coming years, barring some economic catastrophe.

BURNS COMIC BOOKS.

Vancouver, B. C.—In a recent weekend demonstration against crime and horror comic books, the Junior Chamber of Commerce offered a historical, animal or nature lore book for every ten crime or horror "comics" turned in at a downtown park. The response was enthusiastic. More than 8,000 comic books were put on a pile and burned.

More Work

Pat was one day employed by an old lady in the country. At tea time, when the old lady was serving the tea, she laid a small morsel of honey on the plate.

"Begorra, ma'am," said Pat. "I see you keep a bee."

Sarah Anne's COOKING CLASS

Crispy Stuffed Acorn Squash

A familiar vegetable favorite, acorn squash, comes all dressed up as a main course for winter meals in a brand-new version that's as tasty as it is nourishing. This tangy meal-in-itself dish—Crispy Stuffed Acorn Squash—is a real homemaker's delight for satisfying even the heartiest cold-weather appetite in the family. Its delicious stuffing combines chopped ham, onion, and green pepper with coarsely crushed Krispy cracker crumbs for extra good flavor and texture interest. Here's the easy way to make it:

Crispy Stuffed Acorn Squash

- 2 medium-sized acorn squash
- 1/4 cup butter or margarine
- 1/2 cup minced onion
- 1/2 cup minced green pepper
- 1 cup finely chopped ready-to-eat ham
- 4 teaspoons flour
- 2 cups coarsely crushed Sunshine Krispy cracker crumbs
- 1/2 teaspoon dry mustard
- 3/4 teaspoon salt
- Second dash Tabasco
- 1/4 teaspoon Tabasco
- 1 cup milk

Cut squash in half and remove seeds. Brush hollow portion with melted butter or margarine. Sprinkle with salt and pepper; cover with aluminum foil and bake at 400°F. for 45 minutes, or until squash is tender. Meanwhile, saute onion and green pepper in 1 tablespoon of the butter until tender-crisp, but not browned. In medium-sized bowl, combine onion mixture, ham, cracker crumbs, mustard, 3/4 teaspoon salt, pepper and Tabasco. Toss to blend. In same skillet in which onion was sauteed, heat 1 tablespoon of the butter and stir in combined flour and milk. Cook, stirring, until smooth and thickened. Pour over cracker mixture and blend well. Stuff into cavities in halved squash and drizzle remaining butter over the top. Continue to bake for 15 minutes, or until lightly browned. Makes 4 servings.

Plan early for festivities that are to take place so that you can really enjoy them when the time arrives. These recipes will please the most fastidious guests.

Sticky Rolls

- 2 potatoes cooked and mashed
- 1 yeast cake or 1 package yeast softened in a little warm water
- 2 cups flour
- 1 cup sugar
- 1/2 cup butter or margarine
- 2 eggs well beaten
- Raisins
- Nuts
- Chopped citron

Add yeast to almost cool potatoes. Mix well and allow to stand overnight. In the morning add flour and let rise 1 hour. Then add sugar, butter and eggs. Knead in enough additional flour to make dough not quite as stiff as for bread. Let rise 1 hour. Roll out the dough fairly thin, spread with softened butter, sprinkle with raisins, nuts and citron. Roll into a roll. Cut off pieces about 3 inches long. Place in a pan buttered and sprinkled with brown sugar. Bake in an oven 400 degrees for 5 minutes then reduce heat to 350 degrees and cook 15 minutes.

Fruit Salad Plate

- Lettuce
- Pineapple Slices
- Cottage Cheese
- Whole sections of oranges
- Whole sections of grapefruit
- Seedless grapes
- Cherries
- Melon balls
- Ripe Olives
- Celery Hearts
- Mayonnaise
- Fruit Salad Dressing

Arrange a large lettuce cup on each serving plate. Add a pineapple slice and top with cottage cheese. Alternate sections of oranges and grapefruit, slightly overlapping the cheese mound. Add 2 clusters of grapes, cherries and melon balls. Garnish each plate with a ripe olive and celery. Pass mayonnaise and the clear fruit dressing.

Charlotte Russe

- 7 egg whites
- 1 pint cream, whipped
- 1 cup sugar
- 2 tablespoons unflavored gelatin
- 1/2 cup milk
- Lady fingers
- 1 teaspoon vanilla extract
- 1/2 teaspoon almond extract

Beat egg whites stiff and add to the whipped cream which has been sweetened with the cup of sugar. Soften gelatin in the milk. Place in a pan of hot water until dissolved. Add slowly to the cream mixture. Add flavoring. Line mold with lady fingers, pour in half of mixture, then a layer of lady fingers. Pour in the rest of mixture. Chill. This dessert may be made any color by adding vegetable coloring.

Mushroom Turkey Dressing

- 1/2 cup butter
- 2 2/3 cups packaged pre-cooked rice

- 1/2 cup chopped onion
- 1 lb. mushrooms, chopped
- 2 cups diced celery
- 1/2 cup chopped celery leaves
- 1 tablespoon salt
- 1/8 teaspoon pepper
- 1/8 teaspoon dried marjoram
- 1/8 teaspoon dried sage
- 1/8 teaspoon dried thyme
- 2 1/2 cups water
- 2/3 cup chopped pecans

In a saucepan melt butter; add all ingredients except water and pecans. Saute until onions are light brown, stirring constantly. Mix in water. Bring to a boil over high heat; simmer 2 minutes, gently fluffing up rice once or twice with a fork. Remove from heat. Add pecans. Stuff lightly into a 7 lb. turkey.

In Fashion Now

Hair is going to be longer this spring—says the hair stylist. However, not much longer. The tailored line will still be smart. The change calls for a little more softness around the face.

Hats and jewelry are being designed around the short cut. This is good news because the hats, jewelry and dresses you have left from last year will look smart again this year. Daytime jewelry will be a little more conservative. If you remember—last year almost anything "went" for day as well as evening in the jewelry line.

Jewelry manufacturers are trying to revive an old fad—the anklet. All kinds of different designs are being made. Rhinestone ones for evening, pearls for afternoon and tailored silver and gold ones for morning wear.

For some reason, most of us never got used to the idea of wearing a bracelet on our ankle. One thing is certain—this bit of jewelry is only for those lucky girls with trim ankles and beautiful legs.

Clear plastic seems to be coming into its own in a big way. You find more and more shoes and bags constructed of this material. It is certainly easy to keep—there is nothing to do. Also, it is long wearing when of good quality.

Woodcock are small and travel faster than they appear to be. Their wingbeats have been clocked with a high-speed camera at 13.5 a second.—Sports Afield

The Old Timer

"In grandfather's time, parents worried about bringing up their children. Nowadays, their problem is keeping up with them."

AIRPORT FOR ANYWHERE—F-84 Thunderjet is first plane to be hurled into a new era of military aviation from bed of a specially designed truck near Baltimore, Md. With assist from a booster-jet bottle seen hanging beneath tail, plane, with engine at full throttle, is boosted to the 120-m.p.h.-plus take-off speed in a few feet, rather than the eight-thousand-foot-plus runway usually needed. Highly mobile technique was developed through joint efforts of the U. S. Air Force and Glenn L. Martin Company and may someday make long fighter airstrips obsolete.

Meet Mr. Strongheart

DID YOU KNOW THAT YOUR HEART PUMPS EVERY DROP OF YOUR BLOOD TO ALL PARTS OF YOUR BODY AND BACK EVERY MINUTE?

IT'S BY FAR THE STRONGEST MUSCLE IN YOUR BODY!

...WITH A SPECIAL RESERVE OF POWER FOR STRENGTHENED EXERCISE...

YOUR HEART PRODUCES ENOUGH ENERGY IN A LIFETIME TO LIFT A BATTLESHIP 14 FEET OUT OF THE WATER!

Yet...

Despite this, diseases of the heart and circulation are responsible for nearly 800,000 deaths yearly in the United States. Your Heart Association fights the heart diseases through research, through education and through community heart programs. Send your contribution to the 1955 Heart Fund to your local Heart Association, or to "H-E-A-R-T," care of Post Office.

Simple Sudsing 'Saves' Curtains

Above: Crush the folds together to test the curtain for soil, which shows more clearly than when light filters through a single layer. Right: Dainty Orlon curtains can be re-hung when damp and pulled gently into a proper drape. Then, place the ironing board under the window to press the hems.

Clean curtains last longer, and in these days of easy-to-keep wonder fabrics, there's no need to let dingy curtains mar the brightness of your rooms. Those sheer beauties in nylon, Orlon, Dacron or Saran take little effort to refresh. First rule is to wash them at the first sign of soil.

The various "miracle fibers" all require the same kind of washing—by machine or by hand in lukewarm soapsuds and rinses. But never twist, wring, or spin such curtains dry, so that creases will have no chance to "set" in the fabric.

For machine washing, it's a good idea to put curtains into a mesh bag or pillowcase to prevent rowing or twisting. Use short sudsing and rinsing cycles. If you use a dryer, set the temperature at "low" and remove the curtains while still damp.

To wash curtains by hand, fold them loosely to a convenient size and dip in and out of soapsuds and rinses until clean. For a smooth, finished effect, "finger-press" hems, sides, and ruffles while still wet. Hang the curtains smoothly over a line or shower rod to drip dry, and they won't really need ironing. If you do prefer to press them, wait until they are dry and use a cool iron.

New hit with millions!

Kraft's Cheez Whiz
for dozens of fast cheese treats

SPOON IT into hot foods
HEAT IT for cheese sauce
SPREAD IT for snacks

A PASTEURIZED PROCESS CHEESE SPREAD

"Monthly Pains" stopped

or amazingly relieved

in 3 out of 4 cases in doctors' tests! • Chances are you're putting up — unnecessarily — with the functionally caused pains, cramps and "weak, "no good" feelings of menstruation!

For, in actual tests by doctors, Lydia Pinkham's Compound brought complete or striking relief from such distress in 3 out of 4 of the cases!

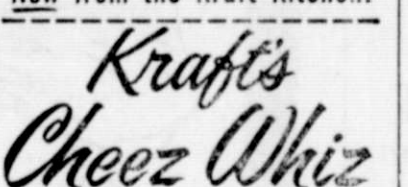

Lydia Pinkham's is modern in its action!

So get Lydia E. Pinkham's Vegetable Compound — or new, improved Tablets with added iron. See if — taken through the month — it doesn't give relief from those backaches, jitters — help you feel better before and during your period!

Or — if you suffer from functional "hot flashes" of "change of life," find out how wonderful Pinkham's is for that, too!

It has a quieting effect on uterine contractions that often cause "period" pain!

New from the Kraft Kitchen!

MEETINGS FOR FARMERS TO BE HELD AT HARTFORD AND WEST BEND TUESDAY

What variety of oats will you plant in 1955?

What kind of commercial fertilizer does your soil need?

What about the use of anhydrous ammonia?

What about liquid fertilizers. Are they as good as the granular type?

What digestion takes place in the rumen of a cow?

These and many other questions will be answered for you at farmers' meetings to be held at Hartford City hall, Tuesday afternoon, March 8, at 1:30 o'clock, and Wisconsin Electric Power Co. hall, West Bend, Tuesday evening, March 8, at 8:00 p. m.

Here is the program:
Film "The Rumen Story"—National Purina film showing the digestion process actually taking place inside of the body of a cow. This is the only film of its kind ever made.

FOND-DU-LAC Ave. & CLINTON ST. TEL. 201R

FORMULA FOR THE FAMILY

Peace of mind... convenience... dependable service... these are the benefits mother enjoys most with home-delivered milk. She knows fresh, locally-produced milk is best for food value. She knows her handy, transparent glass milk bottle is clean and sterile. She knows, too, automatic home delivery is the best way to keep fresh dairy foods always on hand. Call us about having your milk delivered. It's a formula your whole family will find mighty easy to take.

AUCTION
Of the Personal Property of the
WM. BACKHAUS ESTATE
On March 19th at 1:30 p. m. sharp
LOCATED ON MAIN STREET, JUST EAST OF THE BRIDGE.
IN KEWASKUM WISCONSIN.
PERSONAL PROPERTY CONSISTS OF:

Universal 4-burner Shellane stove, Coolerator refrigerator DE77, living room suite, davenport, 3 occasional chairs, 2-way lamp and stand, stand and ash tray, dining room table and 4 chairs and buffet, rocker, 5 chairs, 2 stands, flower pedestal, G. E. Highboy radio, 2 double beds, 2 dressers, single bed, rocker, wash stand, magazine rack, fernery, card table, davenport, 3 rocking chairs, 2 lamps, antiques—vases, candle holders, 1 plant, glasses, 3 dozen miscellaneous dishes (broken set), sugar bowls, creamers,

lawn mower, small tools, sausage filler, table, bed, dresser, sewing machine, 2 kitchen chairs, ironing board, kraut cutter, Barton washer, old cupboard, wash stand, ice box, oil stove, 4 dozen fruit jars, crocks stove for burning rubbish, poultry shears, silverware—hairpins in silver spoons and shells gravy ladle, knives; forks and spoons, bust of child statue, clock (antique), shell lamp, shovels, rakes, garden tools, bedclothes and napkins, dish towels, face and bath towels, pictures.

On March 26th, at 1 p. m., the Real Estate of the same Estate will be sold to the highest bidder, consisting of 1-5 room bungalow, 2 double flats, all located in Kewaskum, Wisconsin. Will give details in next week's issue of this paper.
Usual terms on the personal property.
Col. Lester Dreher, Auctioneer

Germantown Union Free High School Discussed

The Washington County School committee held its public hearing at the Legion hall in the village of Germantown on Monday, Feb. 28 at 8:00 p. m. for the purpose of discussing the creation of a Union High School district in the southeastern section of the county. In spite of the very foggy weather, the electors of the proposed area fully packed the hall. Attorney Bascom, chairman of the committee called the meeting to order and presented the committee to the people and then explained why the committee had ordered this hearing, the reason being that the influx of people in this particular area had created a definite need for a high school.

He then proceeded and explained the statistical brochure which the committee had prepared. This report showed the census data, possible enrollment, the valuation of the proposed district as well as estimated operating costs.

No opposition was voiced to the committee's plan. In fact, several people from the village and town of Germantown area urged the committee to issue an order for that particular area, even though other areas included in the proposed plan might not wish to be included.

The hearing was a most encouraging meeting and the committee is most grateful to all of these people who braved the weather and attended, and especially to the Legionnaires for the use of the hall.

This hearing was adjourned to March 7, when it will reconvene at 8:30 p. m. in the Richfield township hall.

On a limited feeding program, hogs can eat enough pasture to save 30 per cent on feed costs, says Robert Grummer, livestock specialist at the University of Wisconsin.

NEW PROSPECT

Mr. and Mrs. Grossman and Mr. and Mrs. Martin of Waldo, visited Mr. and Mrs. Richard Trapp Sunday. Miss Loraine Girke of Waukesha visited there over the week end.

Mr. and Mrs. Stan Poruban and Lester Stern returned home after spending several weeks in California where they visited their daughter and son-in-law, Mr. and Mrs. Baker. They toured several of the southern states.

Mr. and Mrs. Leo Bowen, daughter Mary Ann, Mrs. Alex Ulrich and son Bernard visited their parents, Mr. and Mrs. Frank Bowen Sunday.

Mr. and Mrs. Paul Giese, Harold and Evelyn and Myron Matthies attended the dartball tournament at West Bend Saturday and Sunday. Mr. and Mrs. Ervin Matthies visited Mr. and Mrs. Clyde Smith Sunday evening and on Monday evening called on Mr. and Mrs. Ruben Drewitz at Long lake.

Offers to help him in his search for answers have come from the Wisconsin Association of School Administrators, the Rural-Urban Community Schools association, the Wisconsin Association of Secondary School Principals, the Wisconsin Town Boards association, and the Wisconsin School Boards association. Other educational groups are considering ways they can help, for all realize the vital importance of solving these problems.

SCHOOL SUPT. SHESKI TAKES PART IN STATEWIDE STUDY

Harry D. Sheski, superintendent of schools in Washington county is taking an active part in the statewide study launched to find the best ways to provide the best possible education for all Wisconsin children.

With the help of the University of Wisconsin and the State Department of Public Instruction, he is tackling through his state association the problems caused by changing school districts, rising enrollments, wide acceptance of the high school diploma as the minimum educational requirement for all, and public demand for better education.

Wisconsin elm trees are in danger. The Dutch elm disease is killing elms in northern Illinois, and the insects that carry the disease are in Wisconsin.
 Seed of SMR 12, a cucumber variety resistant to both spot rot (or scab) and mosaic, will be available in 1955.

To the Electors of Joint School District No. 2 of the Village of Kewaskum, Washington County, Wis.; Kewaskum, Barton, Farmington and Wayne Townships, Washington County, Wis.; and Ashford and Auburn Townships, Fond du Lac County, Wis. . . .

ALL THAT WE ASK

Is that you please take time to look at the Rosenheimer-Volm school site. It has been completely outlined with colored flags so that you may see exactly what land it contains. Compare it with the sites over which it was selected at the Feb. 14th meeting, and decide for yourself which you think is the outstanding site for your future half-million dollar investment in education for our youth.

Drive up and down South Street in the Village of Kewaskum and see it from the north. Notice where 4 separate streets will lead to this area from the village. Think of how easily and quickly you can arrive and leave large gatherings such as athletic events with this adequate road system.

Drive south on Highway 45 to the intersection of county trunk H, and see from that entrance to our village how the site stands out on the highest plateau in the village limits.

Then drive west on County Trunk H, and notice how simply a short street from this road can reach the site to facilitate school bus delivery of rural children from all directions.

And if you care to take the time and wish to really know how adequate this beautiful site is for our new school, you're invited to drive up to the barn on the Volms' land and stand on the plateau in the center of the site, from which point you realize the perfect commanding view you get of the entire village and community.

And while making this tour, bear in mind constantly that this investment is not just for now, or tomorrow, but for many years ahead. Think of the natural directions in which our village and community is bound to expand in the future as it has been expanding the past few years.

You should know that 5 land owners have pledged in writing to donate to the village and community over 30 acres of land, including creeks and woodland, directly adjacent on two sides to this school site for a possible future community park, and that this project has the approval of state park engineers. What could be more ideally compatible than such a possible combination of public properties.

Here are a few facts about the Rosenheimer-Volm site:

1. The Rosenheimer-Volm site, being on the southwest edge of the village, away from factory and commercial areas, enjoys the fresh country air prevailing from the west and is not subjected to smoke, dust, dirt and noise from village industries and traffic.
2. The Rosenheimer-Volm site is safely off the main highways and roads around the village for the protection of our children.
3. The Rosenheimer-Volm site will be serviced by the very adequate sewage system recently installed in the Roseland Heights development, and all that is necessary to provide service to the site is an extension of approximately 500 feet at no expense to the school district.
4. The Rosenheimer-Volm site is so situated that it can easily be expanded if and when necessary.
5. The Rosenheimer-Volm site is the highest site in the entire vicinity suitable for school building purposes. Its highest point rises 45 feet above the intersection of Water street and Main street in the village of Kewaskum, and 43 feet above Water street at the north village limits. A vast plateau in the center of the site of over 500 feet width has a grade differential of less than 8 feet, and for comparison rises above the elevation of our present high school site by approximately 6 feet. Consider the minimum of grading necessary on a site such as this. The athletic field shelf on the lower Eastern end of the site lends itself ideally to the preferred North-South positioned grounds, and an area there of 300 feet by 600 feet has a grade differential of only 6 feet. Since 3 feet are needed for normal drainage, only 3 feet of grading is required. These are expense saving features to consider. The elevation of the athletic area will be 10 feet higher than the intersection of Main street and Water street.

And then, if, after seeing this site, and after fairly comparing it with all others, you have assured yourself that the action taken at the Feb. 14th meeting of purchasing this site for our future school was correct, by all means attend the meeting on Monday, March 14th and vote NO to the question of reconsideration.

Remember, this is the last special meeting that may be called this year, and it undoubtedly will be the final action in the selection of our school site.

TEACUP TOPICS

By BETTY ANN

Materials commonly used in making buttons are given with facts about their use and wearing qualities, says Betty Ann.

Horn buttons are expensive but attractive on tailored clothes. They have a soft transparency and usually are a light color with dark amber or gray streaks within.

Pearl buttons are most used on lightweight suits and coats. They are durable and good looking. Best quality pearl buttons are lustrous, smoothly polished and uniformly thick.

Plastic buttons, which are being used more and more, are inexpensive. Those of good quality serve well, are not affected by pressing, but others may fade, break, or change color. A good plastic button is smoothly finished and the surface is softly polished.

Tortoise shell buttons are used chiefly for decoration, often on coats that fasten with one large button.

Leather buttons, frequently used on sports coats, are expensive, lasting. Chief objection to them is that they darken with use.

Metal buttons are of various types and qualities. Those with satin finish seem to hold up better than shiny ones, which are easily scratched and then become discolored. If the metal button is not smoothly finished underneath it may cut the thread that holds it to the garment and be lost.

Cloth covered buttons are inexpensive and a sure way of matching the suit or coat in color. They wear out quickly and often need to be replaced. If you have the cloth, which may come from having a coat or suit altered, this isn't too much of a problem, since the expense of having buttons made is small.

A package of cake mix will make a pudding if it is steamed. Add orange rind (grated) to the batter, fill well greased custard cups about two-thirds full and tie a couple of thicknesses of wax paper over the top of each cup. Steam the individual puddings about 30 minutes and serve with an orange sauce.

Who doesn't like to play dress-up? Only a woman who's lost the fun of being one.

Everyone, once in a while, likes to shed the sober attire of a practical, careful woman or of a neat, attractive teen-ager and blossom as the wildest sort of femme fatale.

"My goodness!" is written all over a husband's face when he beholds the hothouse orchid he seems to have married. The date thinks he's called at the wrong door.

It's fun for an evening. Cosmetics manufacturers understand this whim of platinum in the average woman. They're providing hair tints that wash out the next day, spangles that glue on a shoulder, eyelashes that bat up a breeze.

Next day, of course, it washes right out.

Spaghetti Meat Sauce

2 pounds ground beef; 4 tablespoons fat; 1 cup chopped onions; 2 cloves garlic; 2/5 cup coarsely chopped green pepper (optional); 2 No. 2 cans tomatoes (5 cups); 2 cans tomato paste; 1 bay leaf; 4 teaspoons worcestershire sauce; 2 teaspoons chili powder; salt; pepper; sugar; 2 8-ounce packages spaghetti; Parmesan cheese.

In a heavy deep pan, heat fat and in it lightly brown onions. Push to one side, add beef and sear thoroughly. Add minced garlic, green pepper, tomatoes, tomato paste, bay leaf, worcestershire sauce, chili powder, two teaspoons salt, one-half teaspoon pepper, and two teaspoons sugar. Cook, covered, over low heat for one and one-half hours, stirring occasionally and adding a little water if needed. Remove bay leaf and add extra salt, if necessary. Serve over hot spaghetti. Sprinkle with Parmesan cheese. Makes 8 servings.

Your family will love frankfurters that have a wrap around of rich baking powder biscuit dough. Bake the frankfurter rolls in a hot oven (425 degrees) for 15 minutes.

Indignant

Little George came home in a sad state. He had a black eye, many scratches, and his clothes were a sight. His mother was horrified and with tears in her eyes, said rebukingly:

"Oh, George, George! How often have I told you not to play with that naughty Brown boy?"

"Play?" answered little George, looking at his mother in deep disgust. "Do I look as if I've been playing with somebody?"

BOHEMIAN WAXWING
©1934 National Wildlife Federation
Bombus garrula

Waxwings in America are undoubtedly better known through acquaintance with the cedar waxwing than with the Bohemian waxwing. In Europe the Bohemian waxwing may be found in great flocks more comparable to what we find with the cedar waxwing here. There is one record in Nebraska of a time when "every tree for miles was filled" with Bohemian waxwings but that was a most exceptional case and probably a slight overstatement.

The Bohemian waxwing is nearly an inch longer than the cedar waxwing, measuring 8 3/4 inches. It is grayer on the back and under parts than the cedar waxwing and has some white and yellow on the wings. Instead of being white under the tail as in the cedar waxwing, the Bohemian waxwing is chestnut-red. The sexes resemble each other but the hen bird is slightly smaller than the cock and some of them may be duller in coloration with less yellow to be found in the male.

Bohemian waxwings range through North America from western Alaska to north-eastern Manitoba and northern Mackenzie south to British Columbia and northern Alberta in the breeding season. They may winter from Nova Scotia to Pennsylvania and west to Colorado and California. It is not considered a common bird in most of the United States. In Canada, the species may rather frequently be found in great flocks such as was described in Nebraska.

Bohemian Waxwings nest in northern forested areas. The nest is commonly placed on a branch high in a tree and is composed of roots, grass and leaves with a lining of down or feathers. From 3 to 6 eggs each to 1 inch long are laid. These are slightly larger than those of the cedar waxwing. Data on incubation and care of young is not generally available. The food of these birds is largely fruits, particularly during the time that is spent in the United States. Since this is winter little or no damage to domestic crops may be expected. In the breeding range and during the breeding season enormous quantities of insects are destroyed.

The flocking habit of our species of waxwings is not only interesting to observe but worth understanding. When a tree is visited by a woodpecker only a small part of the tree gets attention. When a tree is visited by a flock of waxwings it gets "the works." I have seen a row of mountain ashes in my side yard cleaned of fruits in a few visits of cedar waxwings and every year I watch a certain box elder to note that one day it may be well supplied with fruits and the next may be stripped completely. The flocking habits of birds, of mammals, fish and insects all affect the success of the species and of other species with which they are related. The National Wildlife Federation encourages the understanding of such phenomena to the end that man may be more sensible in all his relationships with wildlife.—E. Laurence Palmer.

About Your Home

By FRANCES DELL

The area just inside your front door is very important. Since it is the first thing people see upon entering your home it has a great deal to do with the overall impression.

What impression does your entrance give? Chances are that it has been a long time since you have really looked at it. It is a good idea to stop the soft flooring of the living room before it reaches the front-door area. Use a small section of hard surface flooring or a washable throw rug near the door.

If possible, you will want a place to hang coats and keep rainy-weather clothing in your entrance hall. You will find it very convenient to have a chest or some piece of furniture where you can keep your pocketbook, to hold incoming and outgoing mail or whatever your family needs are.

An entrance should be well-lighted. Take advantage of all the daylight available. A lamp on a chest or table will give a softer light than almost any hanging fixture.

If your entrance is small, use decorating tricks to make it seem more spacious. Try an uncluttered wallpaper for one wall. Paint the other walls a blending color. Keep it light and fairly bright. Yellows and greens will both give the illusion of more space if the right shade is chosen.

Tuna Is Fine Catch When Fishing for New Spaghetti Recipe

BY DOROTHY MADDOX

THIS recipe for Tuna Pompons with Spaghetti is a two-way gift from the sea for the homemaker who perennially faces the question, "What in the world can I serve that's different?" It's a nutrition-packed, tasty answer to the problem when a meatless meal must be served, and it's a real treat for lovers of sea food. You'll enjoy this party day-any day dish. Be sure and add the recipe to your menu file.

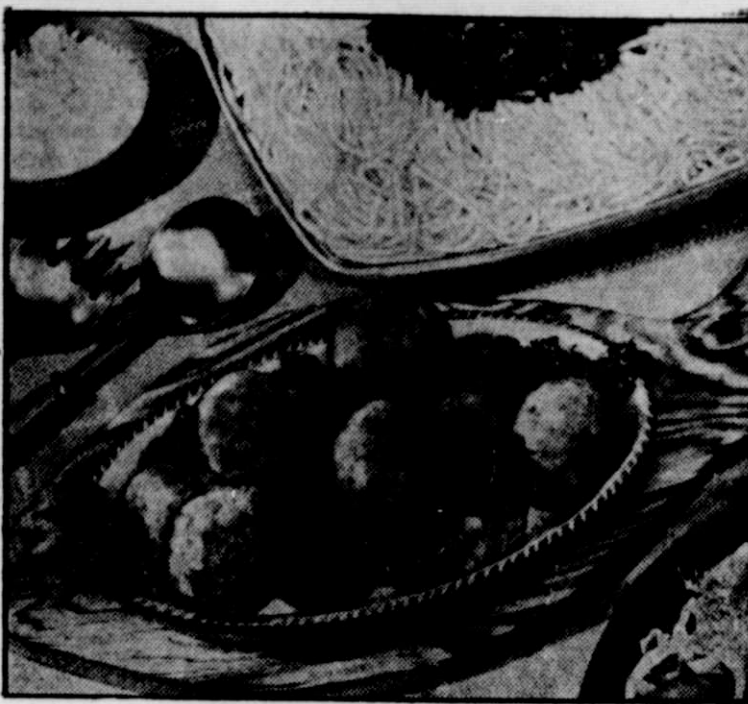

Tuna Pompons with Spaghetti (Makes 4 servings)

Two 6 1/2-ounce cans chunk-style tuna, 2 tablespoons chopped onion, 1 No. 2 can tomato paste, 1 6-ounce can tomato paste, 1 teaspoon oregano, 1 teaspoon salt, freshly ground pepper, 2 eggs, 3/4 cup fine dry bread crumbs, 1/4 teaspoon marjoram, 2 tablespoons margarine or butter, 1 tablespoon salt, 3 quarts boiling water, 8 ounces spaghetti.

Drain tuna and reserve oil. In a saucepan combine 2 tablespoons tuna oil and onion; cook over low heat until onion is golden color. Add tomato paste, oregano, 1 teaspoon salt and pepper; mix thoroughly. Cover and cook over low heat 20 minutes, stirring occasionally.

In a bowl, combine tuna, unbeaten eggs, 1/2 cup crumbs and marjoram; mix thoroughly. Shape tuna mixture into 8 pompons. Roll in remaining crumbs. Melt margarine in skillet and cook pompons over medium heat until lightly browned. If desired, add browned pompons to tomato sauce and cook 5 minutes.

Meanwhile, add 1 tablespoon salt to rapidly boiling water. Gradually add spaghetti so that water continues to boil. Cook uncovered, stirring occasionally, until tender. Drain in colander. Serve tuna pompons with cooked spaghetti and sauce.

Spaghetti is a real catch for the meatless-meal seeker when it comes to the table garnished with Tuna Pompons and sauce.

Health & Beauty

People wonder why it is so easy for old people to break their bones. A young person can receive hard falls and blows, often with no ill effects, but an old person may have a slight fall and fracture the hip or some other bone.

The reason is that age causes such a reduction of animal matter in the skeleton that the bones lose their elasticity. They grow chalky and brittle, so that light falls will often cause serious fractures in an old person.

Much has been learned about bones from X-rays. The causes of several distressing diseases have been found out in this way. Quoting from Dr. Evans: "Some two years before the disease was recognized a man developed a pain in his back which was called pyelitis (pus in the kidneys). A year later he complained of a pain in his side, which was called pleurisy. Three months later he stubbed his toe on a rough place in the pavement and developed a pain in his chest. X-ray pictures of the chest showed some broken ribs."

A disease called multiple myeloma was suspected. Science has discovered tests for diagnosing this malady. They were applied, and the man was found to be a sufferer from this dread condition, which is due to cancer of the bone marrow. It is progressive and spreads from one bone to another. It so weakens the bone that it breaks wherever the disease locates itself. In the case mentioned, a bone fractured about once a month.

A friend of mine, a surgeon, had a similar experience. For several months he was supposed to be suffering from rheumatic

pains in different bones and joints. Then his bones commenced fracturing. Towards the end he was bedridden on an air mattress and was handled with exceeding care, but in spite of every precaution, his bones continued to break.

Some people are born with such fragile bones that they fracture very easily. Most of them have a tendency to deafness and the whites of their eyes are of a bluish cast.

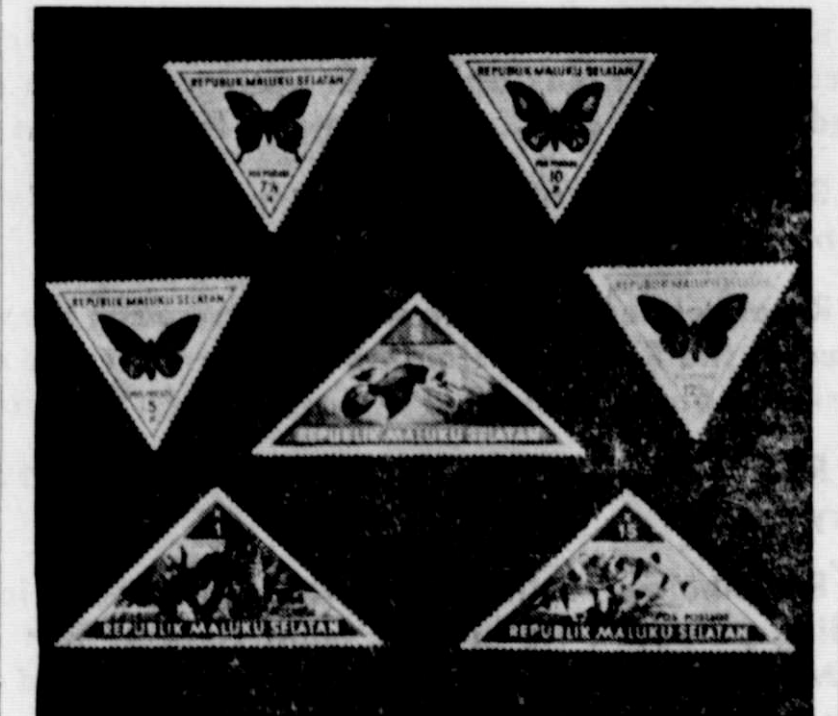

It is difficult for fractures to heal if the sufferers have too little lime in their systems. Milk is our greatest source of lime and children especially should be given an abundant supply of it daily. This helps them to form good sound teeth and bones.

THINGS TO COME—If your zippers stick when they return from the laundry or the cleaner's, a new zipper lubricant, spread on with a little wheel, may be what you need. Robert's Rules of Order have been reduced, as far as possible to slide rule form. A presiding officer can match up eight basic questions about 36 possible motions, and read off whether the member is out of order or whether a question can be debated or must be voted upon at once. A soap dish substitute consists of one magnet to be affixed to the bathroom, another to be shoved into the cake of soap. This summer it will be possible to get a lawn sprinkler which will turn the water on and off while you are on your vacation.

Better Be Safe

Batty: "I can't decide whether to go to a palmist or a mind reader."

Catty: "Better make it the palmist—you know you have a palm."

FOR LETTERS TO NOWHERE—Stamps of the Republic of Maluku Selatan, pictured above, are only good when affixed to mail that's destined for a dream world. On display in Vienna, Austria, they were printed by the Austrian government printing office on order from an American firm. It had ordered the stamps for parties whose country existed, not in Indonesia as represented, but only in wishful thinking. Printing bill: \$5000.

THEY LEAN TOWARD GOLF—Only perpendicular things in this picture are the "I" in its title, "1st. Tuxedo Tournament," and the two gentlemen in right background. The party, still in soup 'n fish, had "tee" to start off the New Year in style at Goose Creek Country Club, Leesburg, Va.

Men Hospitalized More than Women

Recent tabulations show that, as far as health is concerned, the male specie is evidently the weaker sex. Not only do women have a life span which averages six years longer, but they stay in better health during their lifetime than do their male counterparts.

A recent hospital survey showed that male patients in hospitals outnumbered women patients by over 77,000, as of 1953. The total hospital occupancy figures showed 642,156 men and 564,436 women in the country's hospitals. Of course, some of the men in these hospitals might be there as a result of war injuries and permanent ailments incurred in serving their country in times of combat, but the fact that women must bear children and, therefore, occupy hospital beds for this purpose should offset this.

And figures on voluntary health insurance show that more females have this insurance service than do males. Thus, the females are not less thoroughly covered by hospital insurance than are men, generally the workers in the family, which some would have thought.

Dr. Frank G. Dickinson, director of the Bureau of Economic Research, of the American Medical Association, says that the higher hospital incidence of males implies that they are the "sicklier and more hospitalized sex."

Another consideration which some might think would offset the hospital occupancy figures is the fact that more males are born than females, and therefore it might be assumed that there are more males in the United States than females. However, the opposite is true. Females make up about 50.3 per cent of the population, while occupying only about 46.8 per cent of the hospital beds.

Another indication that males are quite susceptible to health deficiencies is the fact that the survey found that there were 11,400 more boys among patients under fifteen years of age in hospitals. Thus it seems that the head of the family—the man who wears the pants—the Tarzan of 1955, is not all he is cracked up to be. With a life expectancy of 65.9 years as compared with his wife's expectancy of 71.8 years, the male is definitely the most fragile article in the average American family.

Tenderfoot

Stableboy (to new rider): Would you like the Texas saddle or the English saddle?

New Rider: What's the difference?

Stableboy: Well, the Texas saddle has a horn and the English saddle hasn't.

New Rider: I'll take the English saddle. I don't expect to be in heavy traffic.

Bible Comment:

St. Paul Told Of Riches Christians Possess

"POOR, yet making many rich"; that is how Saint Paul describes the condition and privilege of the early Christian believers, many of whom were evidently quite poor in worldly goods. "As having nothing," he adds, "and yet possessing all things."

It was not a chance remark or a sentimental idea on the apostle's part, but an expression of his settled philosophy concerning the Christian's possessions. And also, in the First Epistle to the Corinthians, he reasoned more directly concerning the Christians' wealth.

The Christian belongs to Christ. Christ is God's. All things belong to God. Therefore, he writes to the Corinthians, "All things are yours."

The cynic may protest that this sort of wealth will not pay the rent. There is a point in the criticism, but it might also be pointed out that Paul was no visionary dreamer regarding the practical affairs of life.

He worked at his trade as tent-maker to support himself, and he insisted that everybody else should work. He would have no loafers in the Christian community.

Further, if he admonished Christians to "bear one another's burdens," he qualified this with the declaration that "every man shall bear his own burden." There never has been, even to our time, a clearer statement of social and individual responsibility.

His words forcefully bring to the attention that there is a reality of inner wealth and richness of life for which no amount of worldly, material wealth or possession can compensate.

One who has missed the Christian's spiritual possessions has missed the greatest treasure that God and life have to offer.

REAL SWITCH—Trained for work of a more delicate nature, Mrs. Irene Ingison waves Engineer W. E. Johnson on after throwing a manually operated switch in the New York Central's yards at Syracuse, N. Y. The former dressmaker has been on the roster for 10 years.

Common law says that if you start and wound a game animal so that its death is almost certain, but another hunter gives it the finishing shot, it still belongs to you.—Sports Afield

Scotland Yard, probably the world's most famous police headquarters got its name because it stood until 1890 in a short and ancient street where, in medieval times, the kings of Scotland stayed when they came to pay homage to the English crown. Their mansion later became part of the yard of Whitehall Palace—hence Scotland Yard, says the National Geographic Society.

Life would be more simple if more people were willing to be just themselves.

THESE WOMEN!

By d'Alessio

"This is a collection for Edna Golden who's always done such a fine job of taking up office collections!"

STRICTLY BUSINESS

by McFatters

"I'm sure 'Cactus Pete' won't mind if you try Captain Galaxy's cereal!"

SPORTS AFIELD

By Ted Kesting

The crow is a shrewd operator, but not so shrewd that you can't outwit him with a little know-how concerning his habits and with proper equipment. Stand shooting gets the most crows, and good stand shooting starts just before the nesting season and continues until the birds flock in the fall. Basic equipment is a car, a call, a shotgun and plenty of shells.

Using your call properly is the most important single item. If you can't bring the crows in, you're out of luck claims Les Morrow in his story on crow shooting which appeared in Sports Afield magazine. Any call will make a noise something like a crow if you just blow into it. But for best results you must "caw" in your throat as you blow. By biting gently on the mouthpiece and springing the lips of the call slightly closed, you can vary the tone. This technique, together with sound variations in your throat and the amount of blowing, give the different calls. Cupping your hands around the call gives a still more natural tone.

Once on your stand, if you don't get some action after four or five minutes of calling you might just as well pull stakes; the crows just aren't coming. Once you do get their attention, cut loose in a real frenzy of calling.

Make sure you get the first crow that comes over. It's the lookout—an older, smart fellow who knows all the tricks. He'll come over high, circle cautiously out of range, and play it safe. Keep well covered and concentrate on calling. When he makes a swing that will give you a fair shot, let him have it, even if it means momentarily stepping out

of your cover. But get him or he'll warn off the others.

If you expect to get crows, camouflage is important. Crows have very keen sight and a good memory. Before you go into a stand, park your car as inconspicuously as possible, at least 300 yards from where you plan to make your stand. Don't let the crows see you hiking into the woods and don't choose a spot too close to your quarry. The call can be heard a good distance and crows will regularly come a half mile. Be careful in choosing clothing, and rub a little burned cork on your hands and face.

Most crow hunters use a trap load with 7½ size shot or smaller, and make kills at amazingly long ranges. Gauge isn't too important—anything from little 20's up to the 12's will do.

HITS WRONG CAR

Helena, Mont. — While driving along the highway, Albert L. Foster, 31, took a bite out of a plum and decided he did not like it. Without looking, he tossed it out. The plum splattered against the windshield of a car, driven by Patrolman Ernie DeDycker, who stopped Foster and charged him with dumping garbage on a public highway.

Live Disposal Unit

The fancy questionnaire a household appliance company used to survey Iowa housewives brought equally fancy replies. To the question, "What make of garbage disposal unit do you use?" One woman wrote: "Four hogs."

There are dozens of streams called Brule, but the most famous for trout is in Douglas county, Wisconsin.—Sports Afield

THE LAW & YOU

COPYRIGHTS OFFER PROTECTION
Are you an author? An artist? A playwright? Or are you thinking of going into such work? If so, find out about the copyright law. It protects you—against copying, but not against independent reproduction of a similar work.

If someone copies your work or any substantial part of it without your permission, a copyright enables you to sue him in federal court for damages and collect. The most important single thing about copyrights is this: Do not publish anything until you find out what kind of a copyright notice you need, such as you have seen: "Copyright 1954," accompanied by the name of the copyright owner. If you publish without proper notice, you lose all rights in the work.

As long as your book is not published, you own the script. The law protects your rights in it the same as in any other property. For an unpublished book you need no added legal safeguard. You cannot register its copyright before publication.

But you may copyright a manuscript of a play, lecture, sermon, or art work, though it has not been published.

A book's copyright may be registered in the author's name or anyone he selects, such as the publisher, who can better guard the copyright or grant proper consent to quote the book, under a contract between himself and his publisher.

Here are some other kinds of work you can copyright: poems, newspapers, maps, photographs, dramatic musical compositions, and three-dimensional works of art.

A copyright is good for 28 years. You may renew it once so as to keep it in effect for a total of 56 years.

(The Wisconsin Bar Association offers this column to inform, not to advise. Facts may change the application of the law.)

BARBECUED VENISON CHOPS

This is the day of the barbecued food and just about every cook has a pet sauce that—after a number of experiments in additions and subtractions on a basic formula—is just about the finest sauce in the world! Venison chops barbecue beautifully and just in case you lack a sauce or hesitate to apply yours to so precious a cut of venison, we'll recommend this one.

Saute 1 medium onion chopped coarsely and 1 clove garlic minced in 3 tablespoons butter or bacon drippings until transparent, then add 1 cup catsup, ½ cup hot water, 3 tablespoons vinegar, 3 tablespoons lemon juice, 3 tablespoons Worcestershire sauce, ½ cup chopped celery, 1 teaspoon salt, ½ teaspoon dry mustard and from ½ to 1½ tablespoons chili powder, depending on how hot you like your sauce. Bring mixture to a boil and simmer for 20 minutes.

Sear chops in skillet, transfer to roaster, cover with sauce and bake two hours in moderate oven (350 degrees). Turn every 15 minutes.

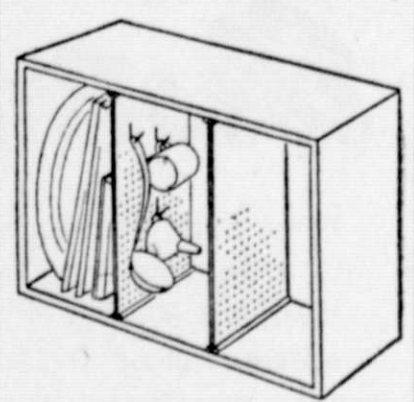

Better Use of Space

"MORE space for storage!" is a frequent demand of home-makers. Sometimes the space is there, but it isn't properly utilized. A case in point is illustrated.

This is an old-fashioned kitchen cupboard, which formerly had just one shelf at the midway point. This was removed and provision made, by the insertion of vertical dividers, for utilizing practically all—not just part of—the space in the cupboard.

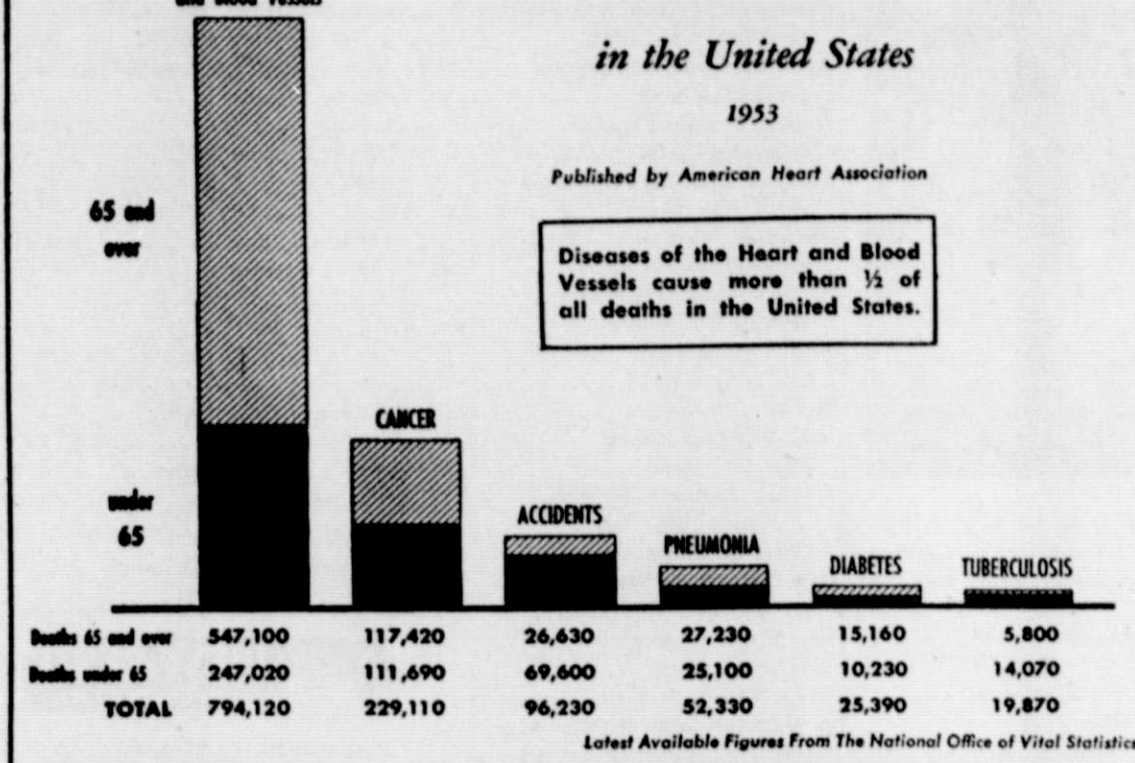

The dividers are Masonite "Peg-Board," the functional panel with dozens of evenly-spaced holes. They

serve not only as leaning places for cookie sheets and platters but as hitching posts for various cooking implements. Metal fixtures designed for kitchen use may be obtained with the perforated Masonite at lumber dealers.

The panels may be installed readily simply by making ¼" channels, the width of the "Peg-Board," from small quarter-round, which is attached with brads. The panels may be painted any color, first applying a prime coat.

LEADING CAUSES OF DEATH in the United States 1953

DISEASES OF THE HEART AND BLOOD VESSELS are responsible for more deaths than all other causes combined. As indicated in the above chart, they head the list even when we consider only deaths in the most productive years below 65. This underscores the importance of the 1955 Heart Fund, which enables the American Heart Association and its affiliates to fight the heart diseases through research, education and community heart programs. Send your contributions to your local Heart Association, or to "H-E-A-R-T," care of Post Office.

Too Many Elk Plague Our Parks

Twenty-eight thousand elk in northwestern Wyoming are giving the Federal Government one of its sharpest wildlife management headaches.

Elk are breeding too fast in the Yellowstone and Grand Teton National Parks area, creating an overpopulation problem more acute than anywhere else in the national parks. Oversized herds spell undernourished animals, depletion of vegetation, particularly aspen and fir trees, and even more serious, land erosion through overgrazing.

The government has tried shooting the elk, only to run into a return volley of criticism. It has tried a helicopter to frighten the elk out of Yellowstone Park into Montana where they were mowed down by waiting hunters. But an expenditure of \$1,000 shooed out only 100 exhausted animals. The government opened Grand Teton National Park to deputized hunters, but in a month and a half during the September-October season only 12 elk had been killed.

Now national, Wyoming and Montana authorities are wrestling with this problem to which there seems no easy answer as yet, says the National Geographic Society.

The Nation's two largest elk herds summer in the high country of Yellowstone Park. One, the north Yellowstone herd of approximately 12,000 head, hoofs northward in the fall and winter when a heavy canopy of snow restricts foraging in the semi-wooded uplands.

Winter drives the other, called the southern or Jackson Hole herd and numbering about 16,000 head, southward into Jackson Hole, a hospitable valley lying east of the Teton Mountains. Many of the north Yellowstone elk remain in the park where hunting is forbidden, even in the worst winter weather.

Outright Killing Tried
Some officials think the most practical method of reducing the

herd is one tried in Yellowstone experimentally a number of years ago: outright killing by rangers. Carcasses were cleaned on the spot and the meat given to charitable institutions.

According to some authorities, this method tended to increase the hunter kill outside the park in Montana. Many hunters figured that if the elk were to be killed they might as well do the killing. As practical as outright killing by rangers may be, it has the formidable disadvantage of stirring public wrath. The government thus is wary of resorting to this method.

The southern elk herd also presents tough problems.

Some 7,000 head, at times as many as 10,000, make their way to the elk refuge near the town of Jackson where the government and the Wyoming game and fish department feed them alfalfa, hay and native grasses. An act of Congress permits hunting in the park each season. In 1952 Wyoming and Federal officials planned a kill of 600 there and 1,200 "openings" for deputy park rangers were established. Only 455 applied for park permits. They killed a mere 27 elk. In addition, approximately 3,000 were shot elsewhere in the Jackson Hole area. This total kill left the herd too large, in the opinion of the government authorities.

Elk, *Cervus canadensis*, the large hoofed "deer" that sheds its antlers each year, presents a population problem on many other Federal and State lands, for example Wind Cave National Park in southwest South Dakota. Elk are multiplying fast also in Montana's Glacier National Park and in Colorado's Rocky Mountain National Park area.

Not So Good
A minister who had just been called to a new pulpit made this announcement:

"Dear loved, I was most unfortunate in losing the manuscript of my sermon for this morning so I shall have to trust to Providence for inspiration. Tonight I will come better prepared."

Factual News About The Eyes

OPTIC TOPICS

It's believed that a person's flow of tears decreases in later life, says the Better Vision Institute. The fact that the cornea of an old eye lacks luster seems to indicate that the film of tear fluid which normally covers the eye grows thinner with advancing age. The importance of this tear fluid is shown up by certain people who have little or none of it and who suffer great discomfort as well as loss of visual acuity. They can be helped by substitute tears.

If a chemical ever splashes into your eye, wash it out immediately with lots of water and get an eyesight specialist without delay, advises the Better Vision Institute. But, if you're really smart, you'll wear safety goggles when ever you're going to be around chemicals. Prevention beats cure any day!

When you step from bright light into near-darkness, it takes your eyes some time to adapt themselves to the change, says Better Vision Institute. Smoking and vitamin A deficiency decrease your ability to dark adapt, caffeine and ephedrine have no effect, while benzadrine, extra oxygen, and deep breathing bring an increase. Long exposure to bright sunlight impairs your night vision at the end of the day, unless you give your eyes the protection of sunglasses during the daytime.

New Gadget
Traffic Cop—"Use your noodle, lady! Use your noodle!"

Lady—"My goodness! Where is it? I've pushed and pulled everything in the car."

WANTED BY THE FBI

CLARENCE DYE with aliases Jockey Dye, "Jock" Unlawful flight to avoid prosecution—armed robbery

DESCRIPTION: Age 44, born July 5, 1910, Pad, W. Va.; height, 5 feet 10 inches; weight, 140 pounds; build, medium; hair, brown; eyes, blue; complexion, fair; race, white; nationality, American; occupations, waiter, cook, bartender, ship fitter, welder, laborer, scars and marks, several small pit scars over face, scars over left eyebrow, blue scar over right eyebrow, small cut scar on right index finger, tattoo of initials "C. D." on right forearm.

A Federal complaint was filed at Akron, Ohio, on November 9, 1951, charging Dye with unlawful flight from the State of Ohio to avoid prosecution for the crime of armed robbery.

Dye is probably armed and should be considered extremely dangerous. Any person having information which may aid in locating this fugitive is requested to contact the nearest office of the FBI, the telephone number of which appears on the first page of local telephone directories.

Behind The Scenes in American Business

By Reynolds Knight

The United States Savings and Loan League, fastest-growing of financing agencies concerned with the nation's home building boom, predicts a fast start this spring, a good summer, and perhaps a little slackening off next fall and winter in residential construction.

Americans are still moving out into the suburbs. Mortgage money is still plentiful, both from government and from private savers. Children of the great birthing boom of right after the war are growing up and crowding their parents into bigger homes. More persons have incomes that allow them to own their own homes. That's the League's summary of favorable factors.

On the minus side: Building has taken care of much of the pent-up demand for housing. Fewer new households are being formed than in the years just passed. Income expansion for many segments of the population has about ended. Some cities have persistent unemployment; the jobless are broke and the jobful are hesitant to spend.

Still, balancing all factors, the League believes 1955 will match the 1,215,000 dwelling units built in 1954. And that was one of the industry's best years.

PROGRESS IN FOOD — Because agriculture is the world's oldest industry, there's a tendency to think of it as "set" in its ways. In this country, at least, the reverse is true. Food production and distribution methods are highly efficient and on the lookout for new ideas.

A case in point is the nine-year-old program of state farm experts and a chain store to encourage production of higher quality yams in South Carolina. County agencies and Agricultural Extension Service workers coach 4-H Club members in the best production practices. Each year the food chain buys carloads of the winners' yams, and gives them a trip to New York as a prize.

Best record this year was a \$661.90 harvest on one acre. The boys' average yield was 365 bushels of yams—170 bushels of them U. S. No. 1 grade. Average per-acre yam production throughout the nation, of all grades, is 90 bushels.

The young visitors to New York see their carload of yams unloaded at 1 a.m., then at 10 a.m. the same day they visit a supermarket and watch the piles of ruddy yams being transferred to shopping carts. The sights of the big city hazard the rest of their visit.

FIRE HAZARD ELIMINATED — The new Miami suburb where houses are priced "at cost," will be the nation's first major housing development to have 100-ampere wiring throughout.

This innovation means that the homeowner can use any number of electrical appliances he wishes without fear of blowing fuses or starting fires.

The builder of the 10,000-home community, says the installation will add \$400,000 to building costs. It's worth it, he says, in elimination of future hazards.

BITS 'O BUSINESS — Commodities rose last week in New York markets on fear of war in the Far East. Steel mills last week operated at 84 per cent of capacity, a yield of 2,019,000 tons of ingots and castings. Farmer's cash receipts in 1954 were 4 per cent under 1953's, said the Bureau of Agricultural Economics.

MORE COSTLY CREDIT — Ever year about this time the New York State Bankers Association holds its midwinter meeting in New York. Just as regularly the New York Federal Reserve Bank buys the members a luncheon. Most times their host, the president of the Reserve Bank, just says he's glad to have them there.

This year the president, Alan Sprout, said the Federal Reserve System meant to let credit tighten up a bit. He said this course was justified by the upturn in business, which no longer needs the stimulation of easy credit.

It's a far piece from the Hotel Commodore in New York to most little businesses and farms scattered over the land, but this news is meant for them too. It's unlikely that any good customers will find he can't borrow for his needs at his local bank. However, he may run into a stricter definition of needs, or even a little higher interest cost.

SCHOOL PUPILS RIDE

One out of every three of the nation's 29,700,000 public school children rode to and from his classes aboard a school bus last year, according to the U.S. Office of Education. In addition to the 8,900,000 children who rode in buses, more than 1,000,000 more were transported to and from school in a family car.

Ten Word INTELLIGRAM

- Check the correct word:
- Four planes U. S. sold to Costa Rica were priced at (\$10,000) (\$1) each.
 - First of the Tachen Islands to fall to Communist Chinese was (Pishan) (Yikiangshan).
 - First filming for public showing was recently made of a presidential (press conference) (cabinet meeting).
 - World's first atom sub, the Nautilus, (has) (has not) been dive-tested.
 - Four convicts recently staged a "freedom or death" rebellion at a (Massachusetts) (Minnesota) state prison.
 - Army is experimenting with atomic irradiation to preserve (food) (stored clothing).
 - Nationalist China planes raiding Red China's coast recently sank a (British) (Russian) vessel.
 - U. S. (2nd) (7th) fleet is stationed in Formosan waters.
 - The 1960 Olympic Games will be held at (Oslo, Norway) (Detroit, Mich.).
 - Designers say that an atom-powered plane (will) (will not) be built in the next year.
- Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

WEEKLY CROSSWORD PUZZLE

Oriental Country

Here's the Answer

HORIZONTAL

- 4 Palm lily
- 5 This country is in —
- 6 Bird's home
- 7 Part of speech is a — state
- 8 It is 18,000 square miles in —
- 9 Tantalum (symbol)
- 10 Belongs to it
- 11 Speaks
- 12 Mistakes
- 17 Note of scale
- 20 Athenian statesman
- 21 Omission of words
- 24 Complained
- 26 Pertaining to wind
- 33 Charm
- 34 Chemical salt
- 36 Dress
- 37 Paths
- 42 Waste allowance
- 43 Level
- 44 Half an em
- 45 Ova
- 46 Group of players
- 49 Mongrel
- 51 The sun
- 53 Down
- 55 Chinese measure

VERTICAL

- 1 Trademarks
- 2 Epic
- 3 Succulent fruit

Kiwanis Pledge is Presented

DON E. ENGDALH, Spokane, Washington, president of Kiwanis International, presents his organization's PLEDGE OF REDEDICATION to President Eisenhower as representative of the people of America.

The Pledge of Rededication reaffirms Kiwanis' determination to serve the individual, the community, and the nation. It was made at the time of Kiwanis' 40th anniversary.

The Pledge which Mr. Engdahl gave to President Eisenhower is similar to that which most Kiwanis presidents are making to the mayors of their communities this year.

President E. "Pat" Miller of our local Kiwanis club presented a similar Pledge to our village president Charles Miller at a recent Kiwanis meeting.

Engdahl and a Kiwanis group were in Washington to attend the fourth biennial Kiwanis Congressional dinner, which was held in honor of the nearly 100 Congressmen and Senators who are members of Kiwanis International.

REMOVE CAUSE & STOMACH ULCERS HEAL NATURALLY

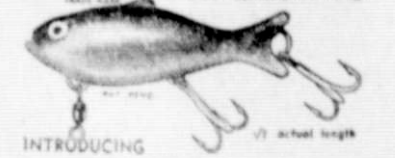

Some of the first indications of ulcers of the stomach are feeling of distention, gas pains, and indigestion. As the ulcers progress dull pains are felt especially while the stomach is empty. In some forms the pain may be absent.

Wrong eating habits, nervousness and nervousness are contributing factors in the formation of ulcers. The underlying cause is the interference with the nerves controlling glandular secretions such as hydrochloric acid and the digestive juices. If it were not for this very delicate mechanism balancing glandular secretions the stomach would digest itself. It is only in the spots where the nerve action to the glands is deficient that digestion of this type occurs.

Chiropractic adjustments remove the underlying cause of ulcers making possible healing and recovery from within.
