

'T WAS EVER THUS!

Sub Makes Debut In Treasure Hunt

Edward J. LeCompte, of Oklahoma City, Okla., is an individualist. When he read about the discovery of \$2,000 worth of gold several years ago off the Bahama Islands, which was part of an old treasure, he decided to act.

LeCompte, a former airplane pattern maker, began the construction of a submarine. It was his idea to take the submarine into the Caribbean and other areas where old treasures might still be unlocated and probe around the ocean depths for wrecks and possible gold.

Though many people have had similar ideas, LeCompte is unusual in that he built a submarine, a three-man sub made of fiberglass. The submarine cost him only \$17,000 and is described as being fourteen feet long and containing its own power plant. It weighs over 6,000 pounds, but is supposed to be able to withstand water pressure at great depths. Fiberglass, according to LeCompte, is three times stronger than steel for its weight and the new submarine will probably make its debut in March, when LeCompte heads for the Caribbean and secret treasures which are reportedly to be found in that area.

We have no idea whether the expedition being planned by LeCompte will succeed or not, but we commend him for his individuality and perseverance. Whether or not he finds any treasure, he will certainly have whipped the problem of boredom and will have done something he will remember for and which he will remember himself pleasantly, until the end of his days. That is, of course, unless he fails to surface on one of his dives.

Televised Press Conferences Held

In recent weeks the President has been experimenting with the television of his weekly press conferences. In former years, this has been suggested but it had always been rejected until this year. Observers generally agree that the experiment has proven a success so far as the President and the people are concerned.

The question is whether the country's newspapers, which long have furnished the majority of reporters in Washington, and who are largely responsible for the beginning of these conferences, will object strenuously to the televising of these conferences. Some newspapers have, on past occasions, objected to the idea of televised news conferences on the ground that television would have this news before they could get it to their readers.

On the other hand, most of

them are willing for parts of conferences to be televised or for some of them to be televised. What some papers might object to is full television of all of the President's news conferences.

The country's newspapers, which are the backbone of news dissemination in this country, have a point. It is one which could be easily satisfied and, in the interest of the people and their better education and enlightenment, we think it should and will be satisfied.

A Note on Hawks

A friend tells us that the old custom of shooting hawks, regardless of what species the particular hawk is, is an ill-founded custom among many farmers and hunters. While there are hawks which do great harm to the quail population, to other game and wild life, there are many hawks which do far more good than harm.

any hawk which soars, like any of the soaring birds, should not be killed. That is, if you see a hawk soaring over a field, or acting in the general behavior pattern of a soaring bird, then it should be spared.

On the other hand, if you find a hawk which does not soar, and which goes about his business more rapidly, then he is the quail-murderer and should be disposed of.

We do not claim to be proficient in the field of ornithology, but we do believe this information should be passed on, since the hawk is a magnificent bird and those species which do the human race good service and keep down the population of undesirable insects and rodents, should not be mistakenly slaughtered.

We have many national parks, but the Cape Hatteras National Seashore is the first effort to keep unspoiled a bit of coast to remind us what the New World used to be like.—Sports Afield

Factual News About The Eyes

Industrial Workers Take It In The Eye

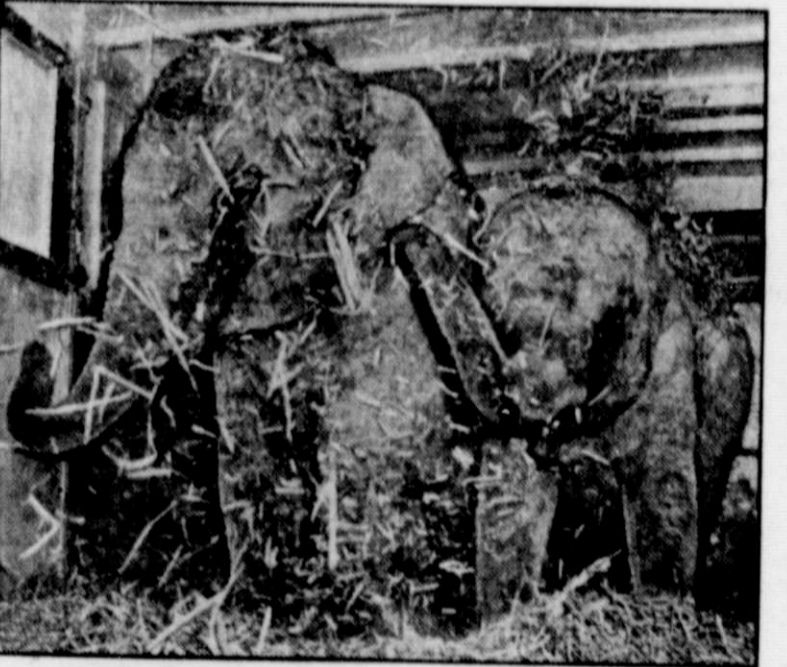

In a study of 53 metal fabricating and processing plants during 1952-53, approximately 17 per cent of all injuries suffered were to the eyes, according to the Better Vision Institute. Almost half the workers had eye accidents during the period covered.

Seventy-five per cent of the plants surveyed did not provide any safety goggles. More than 50 per cent made no check of visual factors when they investigated the cause of accidents.

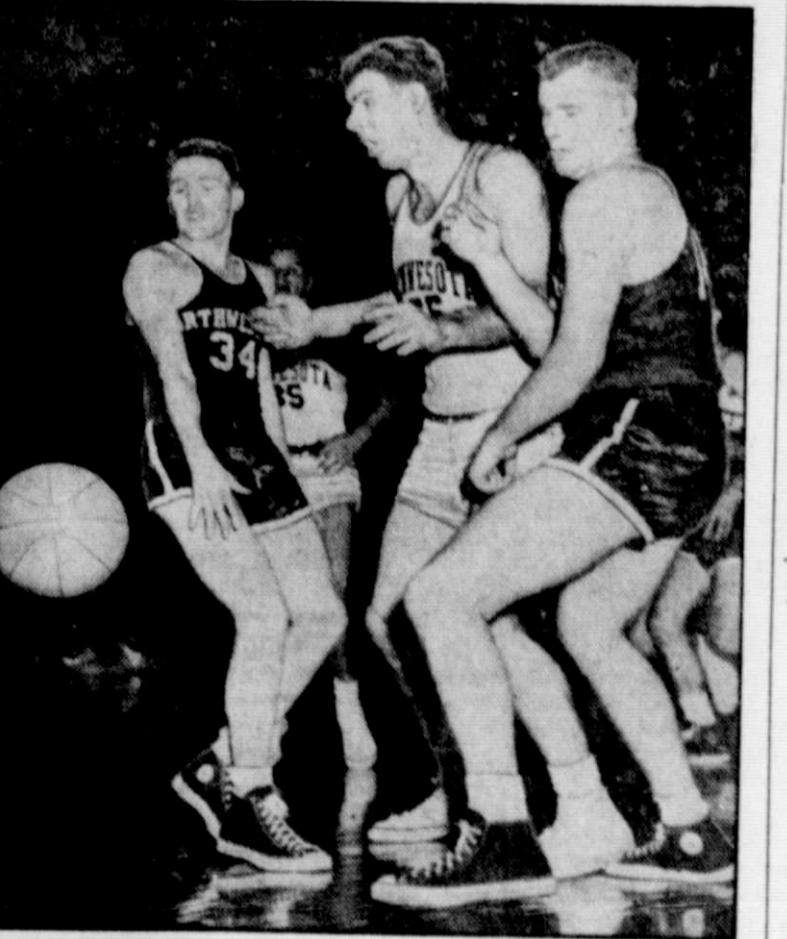

Vision programs involving safety goggles and screening for faulty eyesight are advancing rapidly in American industry, the Institute declares. In plants where such programs don't exist, it is wise for the worker to pay regular visits to an eyesight specialist and follow his advice.

"THIS ONE WILL REALLY SLAY YOU"—Dr. William A. Irwin, of Detroit, Mich., exhibits a prized item of his extensive gun collection: a viola that's nothing to fiddle with. A .44-caliber pistol barrel is fitted into the scroll; trigger protrudes from underside of neck, and cocking hammer is fashioned to resemble part of the scrollwork. The instrument, at least 75 years old, is believed to have been fashioned in Pike County, Ky., heart of the legendary feudin' country.

STRAWSTORM—Photographer is greeted with trunkful of straw by two playful pachyderms as they arrive in New York City for one last fling before settling down to work in an animal act with an American circus, which purchased them abroad.

"LOOK OUT—IT'S LOADED"—Or so you'd think, from the horrified looks on these cagers' faces. Actually, Minnesota's Bill Simonovich, center, let the ball get away from him and North-western's Jim Bragiel, left, and Harold Grant hadn't yet reversed gear in a game at Minneapolis, Minn. The boo-boo failed to jinx the Minnesota team which won, 102-82.

Sports Quiz

1. What did President Warren Gies recently say about expanding the National League?
2. Who is the manager of the Washington Nationals?
3. In what sport is Hamilton Richardson Jr., famed?
4. When did the Philadelphia Phillies last win a flag?
5. What is the last year the Detroit Tigers won a pennant?

The Answers

1. Gies said sentiment among club officials was against it at present.
2. Charlie Dressen.
3. Tennis—amateur.
4. 1950.
5. 1945.

If you feel as though you're a finicky homemaker when you rush around sticking coasters under glasses to save the furniture, get or make crocheted booties for glasses and install them before serving. It will eliminate that overfussy act in front of guests.

STRICTLY FRESH

REDCAP at Tulsa, Okla., bus terminal was given an elderly car in lieu of a tip. In view of repair costs these days, our tip to the porter: Get rid of the car.

Funeral director-state legislator in Georgia tried unsuccessfully for passage of a bill to permit guards to shoot any prisoners who attempted to escape. Just another case of putting all your yeggs in one basket.

Engineer in Chicago, Ill., claims he has invented a machine

to put people to sleep. It'll never replace the after-dinner speaker.

Lady in Columbia, S. C., says she shoplifted a bar of soap because she needed a bath. Judge dry-cleaned her bankroll of \$15.50.

It was 15 degrees below zero recently in Satan's Kingdom, Conn. Maybe now we'll get that 5-spot we said we wouldn't get until a certain place freezes over.

GETTING HEAT TO THE ATTIC

The amount of heat required in attic rooms depends partly on how the rooms are to be used. Also, some people require more heat than others. Here are several heating plans, and the amount of heat that can be expected from each.

Plan No. 1: Radiated Heat Through Ceilings of Rooms Below

Heating in this manner is done by removing insulation from under the floor of the attic rooms. The floor will be kept warm by heat from the downstairs rooms.

Some people do not like heated bedrooms. If such is the case, this plan of heating may be good enough. If the floors are warm, objects in the room will be warmed to some extent, and the room will be comfortable for sleeping.

Plan No. 2: Floor Registers Through Ceilings of Rooms Below

This is a more direct source of heat than Plan No. 1, and will keep the room quite comfortable. It has the disadvantage, however, that the number of places the register can be located is limited. The register should be located in the ceiling of a downstairs hallway or closet, rather than the living room or kitchen. If it happens to serve the needs of the attic room, your heating installation cost will be quite low.

A cold air register located in one of the inside walls will help

the circulation of air from below. Plan No. 3: Heat Ducts and Cold Air Returns

This plan of heating is much more efficient than Plans 1 or 2. It is recommended if the rooms are to be used for living or recreational quarters. Do not remove insulation from between floor joists.

To install this type of heating, it is necessary to extend the heat ducts and cold air returns from the first floor, or to install new ducts from the furnace. These ducts often can be run through closets where they cannot be seen. Unless the home repairman is quite confident of his skill he should have this work done by a workman skilled in heating installation.

Plan No. 4: The Space Heater

Possibly the most efficient type of heater is called the space heater. It is installed in the outside wall of the house. The space heater burns gas, has its own thermostat and will do an efficient job of heating one room.

The cost of the heater installed probably will be little more than the cost of the duct work from your furnace.

Another advantage is that you can leave the insulation between the floor joists and have additional sound proofing.

In selecting the heating plan for your attic rooms, be sure to select the one which serves your purpose best.

Very Tender

"Waiter, is your corn tender?"
"Very, sir, and the sooner you take your foot off the better I'll like it."

A canoe should not be loaded so deeply that it will have less than 5 inches of freeboard (6 for windy lakes).—Sports Afield.

My Neighbors

"Well I'll be darned! Wonder if those highway signs mean what they say, too?"

"Monthly Pains" stopped or amazingly relieved

in 3 out of 4 cases in doctors' tests!
• Chances are you're putting up — unnecessarily — with the functionally caused pains, cramps and "no good" feelings of menstruation!
For, in actual tests by doctors, Lydia Pinkham's Compound brought complete or striking relief from such distress in 3 out of 4 of the cases!
Lydia Pinkham's is modern in its action!
So get Lydia E. Pinkham's Vegetable Compound — or new, improved Tablets with added iron. See if — taken through the month — it doesn't give relief from those backaches, jitters — help you feel better before and during your period!
Or — if you suffer from functional "hot flashes" of "change of life," find out how wonderful Pinkham's is for that, too!

It has a quieting effect on uterine contractions that often cause "period" pain!

Tension & Health Closely Related

Excessive tension and poor health are closely related. Under the stress of today's living a person often suffers not only the pain and distress of the moment, but anxieties and fears which may continue on and on.

Tension not only affects one's mental attitudes, but emotional and physical processes as well. Under tension the heart may beat faster and faster; the muscles become tense; and indigestion, irritability, weakness and actual physical pains occur.

Yet it is usually possible to prevent tensions or to condition oneself so as to cope with troubles with a minimum of discomfort. By following a health routine of work, exercise, rest and nutritious food we are more apt to remain strong in times of stress. Secondly, we can often learn to cope with situations which are charged with fear and find means of relaxation for those which we cannot escape.

Perhaps one of the best methods of relaxation for most of us is to develop a hobby. When we are busy with something we enjoy doing our tensions and worries are temporarily pushed aside or at least are given a constructive outlet. Doing something we like to do brings a feeling of achievement and pride in creation, self confidence in our abilities, and a general feeling of well-being.

Hobbies can take many forms depending on our capabilities and interests. Some men enjoy golf, hunting and fishing while others find photography or wood working more to their choosing. Many women find pleasure in handiwork or painting. To get ideas you can find books on hobbies at local libraries, and often vocational school courses are helpful in teaching the skills one wants to develop.

Hobbies are the "home remedies" that psychiatrists call occupational therapy. As we become engrossed in the interests of a hobby we can make ourselves happier and also restrain the detrimental affects that disturbed emotions often have on physical health.

General Registers For Draft Call

One of the most puzzled Americans in recent weeks was Brigadier-General George R. Stanley, commander of the Connecticut National Guard. The General received a baffling envelope in the mail.

He was ordered to go to the draft board in Hartford, Connecticut, to register for selective service. The General thought the country's armed services had indeed fallen upon some evil times if things were in such a state that he was needed by the draft board. The General was slightly relieved when he found that the notice, through error, had been intended for his son. His son was not similarly relieved.

Sarah Anne's COOKING CLASS

HOT CROSS BUNS

One a penny, two a penny, Hot Cross Buns—You probably remember the poem and the luscious fruit-filled buns from your childhood. Now, during the Lenten season, make Hot Cross Buns for your children (make plenty as the oldsters enjoy them, too). Here are the easy directions.

HOT CROSS BUNS

- | | |
|--|---|
| 2 medium sized potatoes | 2 packages or cakes yeast, active dry or compressed |
| 1/2 cup milk | 3 eggs |
| 1/2 cup sugar | 4 1/2 cups sifted enriched flour |
| 1 1/4 teaspoons salt | Grated peel of 1 lemon |
| 1/2 cup margarine or butter | 3/4 cup raisins |
| 1/2 cup warm, not hot, water (lukewarm for compressed yeast) | 1/2 cup sifted confectioners' sugar |

Pare and boil potatoes. Drain and put through ricer or mash until smooth. Scald milk. Stir in sugar, salt, butter and 1/4 cup of the potatoes. Cool to lukewarm. Measure water into a large mixing bowl (warm, not hot, water for active dry yeast; lukewarm water for compressed yeast). Sprinkle or crumble in yeast, stir until dissolved. Add lukewarm milk-potato mixture. Beat two of the eggs and add to yeast mixture. Stir in half of the flour and lemon peel. Beat until smooth. Add remaining flour or enough to make an easily handled dough. Turn out on lightly floured board and knead quickly and lightly until smooth and elastic—about 8 to 10 minutes. Let rise until doubled in bulk. Punch dough down and turn out on lightly floured board. Knead raisins into dough. Divide dough in half; form each half into a roll about 12 inches long. Cut with a sharp knife into 12 equal pieces. Form into smooth balls. Place in greased 9-inch cake pans about 1/4 inch apart. Separate remaining egg. Beat egg yolk with 2 tablespoons water and brush buns with the mixture. Cover buns and set in a warm place, free from draft, until doubled in bulk. Bake at 375°F. (moderate oven) about 25 minutes. Beat remaining egg white and add enough to confectioners' sugar to make spreading consistency. Drop from tip of spoon, making crosses on tops of buns. Makes 2 dozen hot cross buns.

These excellent recipes feature eggs. Eggs may be combined with a variety of ingredients, such as bacon, cheese, mushrooms, seafood, tomatoes, or your own ideas of a good combination.

Eggs Terrazine

- 4 to 6 oz. spaghetti
- 1/2 cup diced celery
- 2 tablespoons chopped green pepper
- 2 tablespoons chopped parsley
- 1 tablespoon finely chopped onion

- 1 4-oz. can mushrooms, drained
- 1/4 cup butter
- 1 tablespoon flour
- 3/4 cup milk
- 1/4 lb. sharp cheese grated
- 1/2 teaspoon salt
- 2 teaspoons Worcestershire sauce
- 1 tablespoon cooking sherry
- 4 hard boiled eggs
- 1/4 cup grated Parmesan cheese

Cook spaghetti according to package directions. Prepare sauce as follows: cook celery, green pepper, onion and mushrooms in the butter until onion is just transparent. Add flour and blend well. Add milk all at once, cook, stirring constantly until thickened. Blend in sharp cheese, salt,

Worcestershire sauce and cooking sherry. Stir until cheese is melted. Set aside a few center slices of egg for garnish. Chop remaining eggs and add to sauce. Heat to serving temperature, do not overheat. When ready to serve add chopped parsley. Pour over hot spaghetti. Garnish with egg slices and Parmesan cheese.

Buffet Scrambled Eggs

- 1 loaf unsliced white bread
 - Melted butter
 - 1 dozen eggs
 - 1 teaspoon salt
 - Pepper to taste
 - 2/3 cup milk
 - 2 6-oz. packages chive cream cheese crumbled
 - 6 slices Canadian bacon
- Cut loaf of bread in half horizontally. Slice piece off rounded top half so it will rest flat. Remove most of bread from inside each half, leaving shells about 1/2 inch thick. Brush shells with butter. Set aside. Break eggs into a bowl, add salt, pepper, milk and cream cheese. Beat just enough to blend. Melt 1/4 cup butter in a 10 inch frying pan, tilting it so bottom and sides are well covered with butter. When hot pour in egg mixture. Cook over low heat gently scraping bottom and sides with a spoon as mixture sets. Cook until set but still moist. While eggs are cooking, toast bread cups in broiler. Sauté Canadian bacon until lightly brown. Line each side of toast cups with bacon. Spoon eggs into center and serve.

Seafood Casserole

- 8 hard boiled eggs
 - 3 tablespoons mayonnaise
 - 3 tablespoons melted butter
 - 3 tablespoons chopped sweet pickle
 - 1 1/2 teaspoons vinegar
 - 1/2 teaspoon salt
 - 1/2 teaspoon dry mustard
 - Pepper to taste
 - 2 6-oz. cans broiled mushrooms sliced
 - 1 lb. fresh or frozen cleaned shrimp
- Cut eggs in half, remove yolks. Mash yolks, add mayonnaise, butter, pickle, vinegar, and seasonings. Mix well. Refill whites. Cover bottom of 2 quart casserole with mushroom slices, top with deviled eggs and uncooked shrimp. Pour cheese sauce over all and sprinkle with extra grated cheese. Bake in an oven (350 degrees) for 30 minutes.

Cheese Sauce

- 2 cups medium white sauce
 - 1 cup grated American cheese
- Add cheese to hot white sauce. Cook over low heat until cheese is melted.

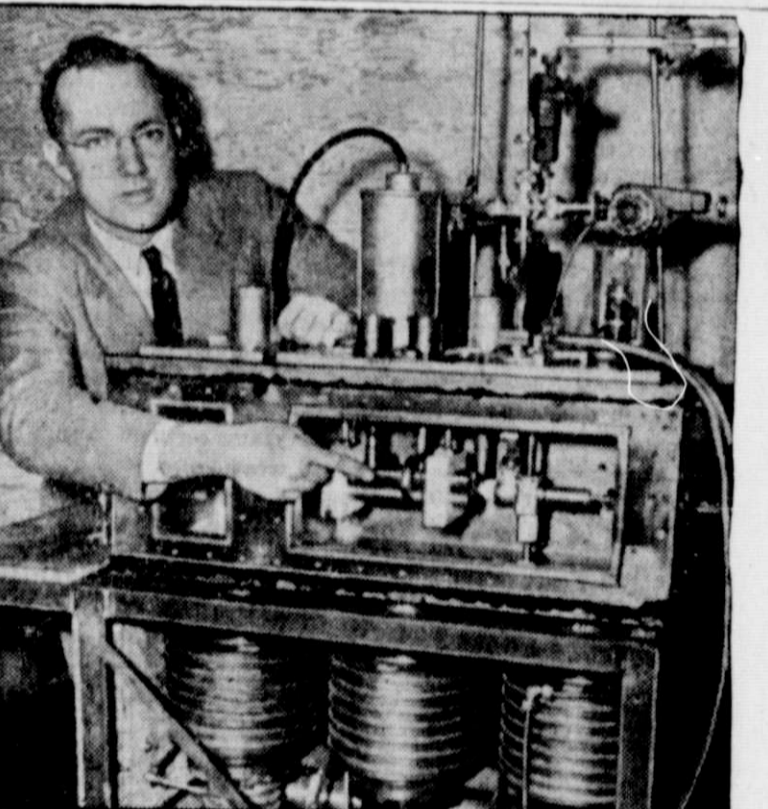

If you are a busy housewife, a rolling cart might help to conserve your energy. Use it for taking laundry from hamper to tub to line and for carrying cleaning equipment from one room to another.

SITE FOR '56 WINTER OLYMPICS—Visitors attending the 1956 Winter Olympic Games may well ride this cable car in the rugged Dolomite Mountains in northern Italy. Rugged Cortina D'Ampezzo, background, is where games will be played.

MAN BEFORE THE GUN—Dwarfed by the muzzle of a coast artillery rifle, this Nationalist Chinese soldier stands guard beneath camouflage netting somewhere along the Formosan coastline which would be a point of attack for water-borne invasion forces from Communist China, some 100-plus miles over the horizon. (Photo from U. S. Army Signal Corps film.)

TIME FOR ATOM AGE—Prof. Charles H. Townes, of Columbia University, points to mechanism of his "atomic clock," a device so accurate that it is expected not to vary more than one second from correct time in 300 years. Called "Maser" for its function, Microwave Amplification by Stimulated Emission of Radiation, it uses energy radiated by molecules of ammonia as its timing standard. Expected to play a role in navigation and spectroscopic study of molecular structure, the device may be used to solve the ages-old riddle as to whether the earth is slowing up or increasing its rate of rotation.

COLD COMFORT FOR "HOT" PILOTS—Frosted dummy, above, leads a frigid existence in Republic Aviation's 65-degree-below-zero cold room at Farmingdale, N. Y., so that U. S. Air Force pilots will be sitting pretty in all climates when flying their missions. Research engineer Tom Tomlinson conducts tests of the seat, similar to those installed in F-84 atom-bomb-carriers. It hugs pilot protectively and, in emergencies, ejects him from the plane and then opens his safety belt prior to parachute drop.

AUCTION

OF WM. BACKHAUS ESTATE

3 homes to be sold in one afternoon, all located in different locations, in Kewaskum, on

MARCH 26th, 1955

THE 1ST PROPERTY TO BE PUT UP FOR SALE, AT 1 O'CLOCK SHARP WILL BE:

PARCEL NO. 1

A 6-room bungalow, 2 bedrooms, large attic, full basement, automatic oil heat, 2 car garage, buildings about 10 years old. Lot is about 70x120 foot. Located on east side of town, on Main street, near bridge, about 2 blocks from good shopping district, near schools and churches. This place has been held vacant for new owners.

PARCEL NO. 2

This is an income property, 2 family home, with 6 rooms and bath down, and 5 rooms and bath on 2nd floor, large attic, full basement, steam heated by coal. Barn now used as garage. Large lot 70 by 120. Located in one of the best locations in Kewaskum, near park, ¼ block from general store, 7 car churches and schools. Located on West Water street, ¼ block south of Main street.

PARCEL NO. 3

This is also an income property, with 2 family apartments, each has 4 rooms and bath, steam heated by coal, attic and has full basement, 2 car garage. Large lot about 60x120 foot, large garden space, is located on the north end of North

Fond du Lac ave; 3 blocks from shopping center, about 5 blocks to grade and high school, and about 6 blocks to churches. These two properties are fully rented, and bringing a good return on money spent.

Inspection of these properties can only be made on date of sale, and just before the sale of each. An agreement was made with the tenants, to show their apartments at that time.

The Administrator and the Attorney of the Estate will be on each and every one of these properties at time of sale.

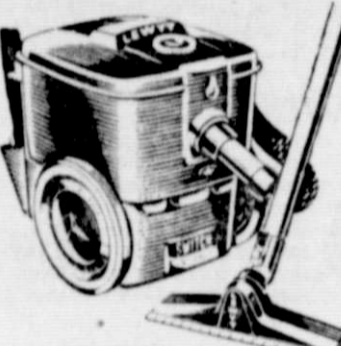

The rentals and taxes will be announced just before each property is put up for sale.

The TERMS on each property can be discussed with the ADMINISTRATOR or the Real Estate Broker.

A complete merchantable abstract will go with each property, together with a warranty deed.

ADMINISTRATOR—Bank of Kewaskum

ONE THIRD OF YOUR LIFE SPENT IN BED

The lifetime of the average individual is divided up in approximately the following manner; one third of his time is spent in work, one third is spent in sleeping, one twelfth in eating, and one fourth in all other activities. It is seen from these figures that sleep is an important part of our lives.

Research has given us this important fact regarding sleep. Each individual requires a different number of hours of sleep. What is sufficient for one is not sufficient for another. It is wise that every one know the amount of sleep necessary in his case and get that amount of sleep as consistently as possible.

Worry, emotional strain, excitement, and nerve irritation are factors concerned with the inability to sleep. Chiropractic adjustments bring about relaxation and are therefore beneficial in many cases of insomnia.

You can't talk around the facts

Here's why Pontiac Sales are at an All-Time High!

1. Biggest Car Priced So Near the Lowest! Pontiac's 122" or 124" wheelbase is 6½ to 8½ inches longer than any of the "low-price three."
2. Most Distinctive Styling At Any Price! No matter how much you pay for a car, you can't match the years-ahead beauty of Pontiac's Twin-Streak distinction and Vogue Two-Tone colors.
3. Most Power Per Dollar in its Field! Pontiac's Strato-Streak V-8 delivers more power than any other car at its price—with the greatest economy in Pontiac history!
4. You can buy a big, powerful Pontiac for less than many models of the lowest-priced cars or stripped economy models of higher-priced makes! Come in soon... and drive and price Pontiac. You'll quickly see why Pontiac is setting new sales records!

Look High and Low ... and You'll Go Pontiac!

"CONCERNING GERMS"

A question frequently asked of Chiropractors is: "What about germ diseases?" We are surrounded, covered, and filled with germs. Some germs are beneficial and absolutely necessary to our bodily functions. The body knows and destroys its enemies. This ability is what is meant by "NATURAL RESISTANCE TO DISEASE."

Many maintain that germs are really scavengers and breed upon diseased tissues, their presence being a result of, and not a cause of disease. It is generally agreed that "LOWERED RESISTANCE" is the prime cause of those diseases in the body which have been called "infectious." For example: A properly nourished, properly functioning lung, whose nerve supply is not obstructed, does not yield to tuberculosis.

Chiropractic in concentrating on the 'nervous system,' is attacking the fundamental cause of disease processes and thereby allows the body to intellectually protect itself.

SPORTS AFIELD

By Ted Kesting

What do you do with your bird dog when the hunting season is over? Let him languish in the back yard, put him in a boarding kennel and forget about him until next season, let him grow fat and lazy as the family pet?

It's a shame if you do when there is a ready-made sport just waiting for you to take advantage of it. I mean bird-dog field trials. You say field trials are not for you—you've got a gun dog, not a race horse? Let me assure you that if your dog will hunt to the gun, is a good bird finder and will point and hold 'em until you can come up and flush, field trials are for you.

The gun-dog or shooting-dog trials are proving very popular all over the country. In an article in Sports Afield magazine, dog expert Henry P. Davis explains that these are one-course affairs where the competition is confined to a limited amount of land. Each brace of dogs is tested for ground work—handling response, style in action, hunting intelligence, pace and range—over a back section of the course. Each brace is allowed the same amount of time, usually 30 minutes, in which to negotiate the flagged coverts. The dogs are gradually swung, usually in a horse shoe shaped course, back to the more open area near the starting point, which is designated as a bird field. In this area pen-raised game birds (usually pheasants or quail) are planted or released. This bird field is placed in such a position that the gallery of spectators can remain near the starting point and still see most of the game-handling work. Two experienced judges follow each brace.

In almost every section of the country where bird dogs are to value in hunting, sportsmen's clubs cooperate with each other in spacing events so as to provide a regular circuit of week end affairs that run from early spring into early summer, and from early fall into the regular hunting

season. And in these programs many clubs provide stakes especially designed for rough and tumble "meat dogs" where niceties of manners and examples of the trainer's art (such as steadiness to wing and shot, and even backing or honoring a brace-mate's point) are not absolute requirements. Here emphasis is placed on the dogs manner of handling to the gun, responding to his owner's command, his natural hunting ability and his proficiency in finding and handling game.

February is the 45th anniversary of the founding of the Boy Scouts.—Sports Afield

CURBSIDE KING—Andre Pierre, "King of the Boulevard Vendors," uses a jester's scepter to smooth on some of the cream he sells so successfully as a Parisian street merchant. His "smooth" salesmanship won him the coveted title, which is awarded annually.

Ten Word INTELLIGRAM

Check the correct word:

1. Nationalist China says troops from Tachens (will) (will not) be deployed to other islands.
2. (No) (a few) civilians elected to stay on the islands.
3. Mendes-France's regime was (20th) (10th) French government to fall since World War II.
4. Under a proposed plan, reserve Air Force units would be ready for mobilization in (30 days) (30 hours).
5. President Eisenhower recently presented Congress with a plan to improve the nation's (school) (radar) system.
6. Vice President Nixon is touring the (Caribbean) (Far East).
7. (Gunnar Nielsen) (Wes Santee) holds world's indoor mile record.
8. First crossing of Antarctic by land vehicle is proposed by (Britain) (U. S.).
9. (Air Force) (Army) plans shorts as summer uniform.
10. New nuclear bomb tests are believed to have occurred in (Australia) (Russia).

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

Decoded Intelligram

1-Will, 2-A few, 3-20th, 4-30 hours, 5-School, 6-Caribbean, 7-Nielsen, 8-Britain, 9-Air Force, 10-Russia.

RIGGED FOR WINTER—Tony Frontiero chips ice from rigging of the fishing trawler Tony Maltos as she arrives at New York City's Fulton Fish Market, fresh-frozen from a trip off Gloucester, Mass., during the winter's worst east coast cold wave.

A Matter of "Family"

Mr. and Mrs. Frank Klinker, Madelia, had 12 of 13 sons and daughters at a family reunion, seven of the sons in military uniforms they have worn; several of 22 grandchildren were on hand, too . . . It is theoretically possible for a child to have at least 28 living grandparents: 4 grand, 8 great-grand, 16 great-great-grand; Steven Larson, Hoffman, has nearly half his quota—13 of the possible 14 on the paternal side . . . Susan Kay Larson, Oronoco, has 12 grandparents—six each, grand and great-grand, the oldest 97 . . . Augustus and Richard Hillyer, Minneapolis, are 90-year-old twins . . . Among 14 sets of twins in Worthington public schools are two pairs of boys

OUR DEMOCRACY—by Mat

"AMERIGO" TO "AMERICA"

THE MAN FOR WHOM OUR LAND WAS NAMED, AMERIGO VESPUCCI, WAS BORN 500 YEARS AGO IN FLORENCE, FROM 1499 TO 1502 HE MADE FOUR VOYAGES ACROSS THE ATLANTIC. HE MAY NEVER HAVE SEEN THE LAND THAT WE INHABIT TODAY, BUT AN EARLY MAP-MAKER'S USE OF THE TERM "AMERICA" TOOK HOLD.

HISTORICALLY, THIS NAME HAS BEEN SHARED BY US IN THE UNITED STATES AND OUR NEIGHBORS IN THE WESTERN HEMISPHERE. AND TRADITIONALLY, WE OF THE AMERICAN REPUBLICS SHARE A COMMON STRIVING TOWARD DEMOCRACY AND WE RECOGNIZE THAT TO A GREAT EXTENT WE HAVE A COMMON DESTINY.

Behind The Scenes in American Business

By Reynolds Knight

If Congress approves the terms reached by the Rubber Producing Facilities Disposal Commission, 24 of the 27 synthetic rubber plants owned by the government will soon pass into private hands.

And if this happens, it will be one of the few times in history in which the taxpayers will get their money's worth out of the post-war sale of equipment and facilities created, almost heedless of cost, to meet the needs of a national emergency.

Under the plan, the government will recover 96.6 per cent of its net investment in the wartime and postwar rubber program, and will still own the three other plants.

Actually the gain for the country as a whole—a large one in dollars—can't be fully measured in dollars. Tremendous strides in technology have been made, contributed by private industry. There's no way, for example, of putting a price tag on such assets as the 100 patents contributed by a leading rubber company, which pioneered synthetic rubber long before World War II. This company also took the leading role in building the man-made rubber plants for the war effort.

BIGGER BILLS AHEAD—Legislatures in 46 states are meeting this year. More than 20 of them are in session already. Topic No. 1: More taxes.

In the Federal fiscal year which ended last June 30, states collected \$11.1 billion, according to government figures, and spent \$11.4 billion. The latter figure is preliminary.

With 4,000,000 children born in the United States in 1954, the states' tax burden will get heavier before it gets lighter, since the chief use of state funds is in supporting schools, from kindergarten through university.

President Eisenhower's road program also foreshadows more state taxes. He is counting on matching state funds to supplement Federally-raised sums for his \$101 billion ten-year highway plans. Last week Mr. Eisenhower proposed Federal funds for building schools. This would ease local taxes, but at the expense of heavier Federal imposts on the more prosperous states.

Generally speaking, governors and legislators plan to meet their deficits by raising taxes, rather than by economies in fields less essential than roads and schools.

GAS OUTLOOK—Nineteen-fifty-five shapes up as a good year for the entire gas industry, according to a survey by a major gas appliance manufacturers association. So good, in fact, that there is room for belief that the industry may top its previous record year of 1950.

Biggest increase is expected by manufacturers of gas furnaces, who set an all-time record last year by shipping 670,000 units. Based on expectations of individual companies, 1955 may see this figure bettered by 27 per cent.

Manufacturers of other types of gas equipment also are optimistic. Boiler manufacturers think their sales may increase 14 per cent. Gas range makers, offering many new fange designs and features, think in terms of a 12 per cent advance. Manufacturers of gas water heaters believe they will set a new peak with sales up as high as 13 per cent.

Other hoped-for increases: Gas conversion units, 20 per cent; vented recessed wall heaters, 20 per cent; gas unit heaters, 15.7 per cent; domestic incinerators, 17 per cent.

SOAP COMEBACK—The American uses each year a far greater poundage of preparations to keep himself, his home and his clothing clean than does the citizen of any other country. In the face of the statistic, the price of soap-making fats has been declining almost steadily since the war.

The reason, of course, is synthetic detergents. These took a huge chunk of the laundry and dish-washing markets, and even bit vigorously into the shampoo demand soap once enjoyed.

Now exports have come to the rescue. Dealers in inedible fats are buying up tallow and kindred fats for shipment into markets that are smaller but relatively free of detergent competition. Tallow prices are knocking at 1951 levels.

On the other end of the seesaw are the food fats which enjoyed a long boom. Two big pig crops and a bounteous soybean harvest last year have more than offset a relatively poor cotton crop. Butter production has not been exceedingly high, but support prices have diverted it into storage, so the visible supply is large.

HERES' HOW...

SEAL WOOD SURFACES

For a fine finishing job, wood must be properly sanded, the surface filled and sealed, and then resanded before the final finish is applied.

On some woods, especially those with coarse grain, varnish is absorbed unevenly, causing light and dark spots. Uneven surfaces are accentuated when the finish is applied. It is usually necessary, therefore, to treat the wood surface.

Wood fillers speed up the finishing job and help produce a more beautiful finish.

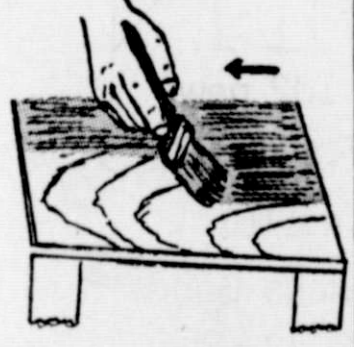

Liquid sealers are used for fine-grained woods. The sealer

is applied with a brush, in the direction of the grain. When the liquid sealer has dried, it should be sanded with 5-0 garnet paper or 000 steel wool.

Paste fillers are used for coarse-grained woods. The filler is applied with a brush, across the grain. Excess filler is removed by rubbing across the grain with burlap. Then the piece is rubbed in the direction of the grain. When the filler has set it should be sanded, with the grain, with 5-0 garnet paper or 000 steel wool.

Then the article should be cleaned before the varnish is applied. Rub with a cloth dampened in benzene or similar cleaner. For cleaning joints, moldings, corners, etc., use a pickling stick—a sharpened dowel wrapped in a cloth dampened with cleaning fluid.

Shellac is commonly used as a filler. Usually two thin coats are applied. Sand the piece after the first coat has dried to remove the shellac from the wood surface. Use white shellac for light colored woods or finishes, and orange shellac for the dark ones.

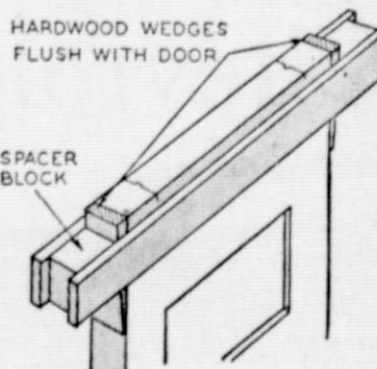

National Lumber Manufacturers Association

Handy Jim's FIX-UP TIPS For the Home

How to Plane Top of Door

DOORS that scrape at the top or bottom are a nuisance. Planing down the high spots, of course, is the best cure.

A problem in connection with the planing operation, however, is the likelihood of splitting the wood when shaving across the end grains of the door stile. The jig described

will prevent this. The illustration appeared in *American Builder*, the magazine published for professional builders.

Take two 1 x 4's about four feet long and nail two suitable spacer blocks between the two, leaving a space of about one inch between the door and the block at either end. Make two tapering wedges from a piece of hardwood, making them an inch thick at their widest point.

Place the jig over the end of the upright door and drive the wedges into position as shown. Now the plane may be run across the door in either direction without danger of splitting the wood.

Here's the Answer

School Minutes

(CONTINUED FROM PAGE ONE) the first and third floors, the chairman could not distinguish between the number of ayes and nos. The clerk of the Board of Education volunteered to read the minutes of the previous meeting. Minutes were read.

Further discussion followed, during which several electors gave their views on the sites considered.

It was moved by Lester Dreher and seconded by Cyril Wietor that we reconsider. The following residents of the various municipalities in the district were appointed as ballot clerks and tellers: Ed. Campbell, Alfred Seefeldt, Arnold Amerling, Raymond Schaefer, Harvey Janssen, Fred Dorn, Andrew

Kirchner, Ed. Junk, Arthur Nohr, George Peter, Paul Pamperin, Paul Schmidt, Paul Moritz, Elmer Plaum, Willard Grubbe, Carl Hauch, Ray Bales, Henry Oppermann, William Martin, William Harbeck, Robert Schmidt and Harry Koch. Prepared ballots had been distributed to the electors upon their arrival at the meeting by representatives of the different municipalities in the district. Result of the secret ballot was as follows:

Yes 441
No 236
Void 2
Blank 6

The chairman then instructed the electors as to the method of balloting for the selection of the site, using the process of eliminating the site having the least number of votes, then continuing balloting until one site received a majority of the votes cast. Tellers then collected and tabulated the first ballot with the following result:

Bligo 352
Melahn 33
River Road 57
Rosenheimer-Voim 222
Blank 5

The Bligo site received a majority of the votes cast on the first ballot. The following resolution was read by T. W. Simester:

Be it resolved by the electors of THE KEWASKUM COMMUNITY UNION HIGH SCHOOL JOINT DISTRICT 2 OF THE VILLAGE OF

KEWASKUM, WASHINGTON CO., THE TOWNSHIPS OF KEWASKUM, BARTON, FARMINGTON AND WAYNE, WASHINGTON COUNTY, AND ASHFORD AND AUBURN TOWNSHIPS, FOND DU LAC COUNTY, WISCONSIN, 1. That the premises discussed at this meeting and referred to in such discussion as the Bligo site and particularly described in the option running to the School District be and the same hereby are designated as a school site. 2. That a tax sufficient in amount to pay and for the purpose of paying the purchase price of such site together with any interest that may accrue thereon be and

the same hereby is levied on the taxable property of the District. 3. That the Director and Clerk of this District be and they hereby are authorized and directed to take all steps necessary to complete the acquisition of such premises as a school site and the payment of the cost of such acquisition; including but not by enumeration limited to: the acceptance of deeds; the issuance of memoranda evidencing the District's obligation to pay deferred installments of purchase price, the execution of land contract purchase agreements; the temporary borrowing of funds prior to the availability thereof from the tax heretofore levied, and generally to do all acts and things necessary for or incidental to such acquisition

ard payment, either by outright purchase and full payment of purchase price; by purchase and provision for installment payment of the purchase price with interest on unpaid portions at 3% per annum; by purchase on land contract with interest at 3% per annum on unpaid portions of contract price; or by such other mechanics as said officers may select. It was moved by John Martin and seconded by Charles Miller that the resolution as read be adopted. Motion was carried unanimously by acclamation. It was moved by Charles Miller and seconded by Giles Wierman to adjourn. Motion carried. Meeting adjourned. Clifford C. Stautz Clerk, Board of Education (Note: All motions are worded exactly as presented.)

You need MILK...

YOU NEVER OUTGROW YOUR NEED FOR MILK
YOU'LL LOOK BETTER, feel better, actually be better when you drink enough milk. Adequate intake of milk does four wonderful things for you—*makes you sleep better . . . eases nervous tension . . . ends calcium starvation . . . and builds strength, not fat!* Drink at least three glasses everyday. It's the healthiest habit you can have.

Put yourself in this seat

motoramic Chevrolet

A demonstration drive can help you **WIN** one of 102 new **CHEVROLETS** plus a \$1,000 U. S. Savings Bond in our big **MIRACLE MILE CONTEST** . . . and you'll have the driving time of your life!

Come in and drive the Motoramic Chevrolet just for the fun of it. And when you do, you'll make discoveries that can help you be a winner in our Miracle Mile Contest. For example, you'll notice how exclusive Anti-Dive braking control lets you stop with far less lurching or diving. And you'll tingle to the peppery response you get when your toe nudges the accelerator. Come in and have the driving time of your life at the wheel of a new Chevrolet! Enter our big Miracle Mile Contest, without cost or obligation, and you may win one of 102 new Chevrolets given away.

STEALING THE THUNDER FROM THE HIGH-PRICED CARS!

"COMPLETE and OFFICIAL figures show that again in 1954 — for the 19th straight year — MORE PEOPLE BOUGHT CHEVROLETS THAN ANY OTHER CAR!"
